The Ballpoint Pen

Ballpoint pens have not been around for very long. John Loud invented the first ballpoint pen in 1888. Before the invention of ballpoint pens, people had to dip their pens into ink when they were writing. This made writing slow. Also, sometimes too much ink made the writing messy. Ballpoint pens were the first pens that did not need to be dipped in ink. Laud's invention was wonderful, but the design was still not perfect. Sometimes the pen did not get enough ink, and sometimes it got too much ink. Other inventors continued to work on the design of the ballpoint pen to improve it. For the next 30 years, inventors created over 350 kinds of ballpoint pens. But still the pens did not work very well, and people did not buy them. It wasn't until 1935 that Ladislav Biro and his brother developed an improved ballpoint pen in Hungary. Today, in the U.K. and Australia, some people call ballpoint pens biros after their inventor.

Department Store Robbed!

One night, in Germany, three men robbed a department store. Cameras showed three men with masks over their faces robbing the store and getting away. The men stole jewelry that was worth \$6.8 million. The police didn't know who the men were until they found a drop of sweat, which contained DNA. Scientists tested the DNA and, amazingly, they found two matches—identical twins named Hans and Franz. The police knew that one of the twins had robbed the store, but they didn't know which one. They questioned both of them, but each twin said that he did not rob the store. Finally, the police had to let both twins go. They were not able to find out which one was the robber. Now, all the police can do is watch both twins and hope that one of them leads them to the stolen jewelry.

Why do we have speed limits?

Most roads in most countries have a speed limit. When driving on these roads, drivers must obey the speed limit. In the U.S., the speed limit on most highways is 65 miles (105 kilometers) per hour. In Europe, the speed limit on most highways is a little higher—about 75 miles (120 kilometers) per hour.

Generally, speed limits are intended to make driving safer for everyone. People who are driving fast are more likely to die in car accidents. Over the past 40 years, lowering the speed limit on highways has lowered the amount of people who have died in car accidents. Some roads also have minimum speed limits. This means that you must not drive slower than the minimum speed. Highways have minimum speed limits because people who drive too slowly can be dangerous when all of the other drivers are moving fast.

Speed limits are also made for environmental reasons. Driving slower uses less gas and causes less pollution. But, whatever the reason for the speed limit, no matter what country you are driving in, you must obey the speed limit. If you drive too fast, you will probably have to pay a fine, or penalty.

1. The speed limit in Europe is generally lower than in the U.S. (F)
2. Speed limits help keep people safe. (T)
3. Driving too fast can cause people to die in a car accident. (T)
4. It is always safe to drive slowly. (F)
5. Driving fast causes less pollution. (F)
