Projected market share

Quick IELTS Centre Q I C

The bar graph illustrates the assessment sales of jeans of two certain companies in Turkey next year; and the pie chart shows the prediction of those companies in market share at the end of next year.

In Jan, Jack & Jones Co will be higher than Mango Co. However, in Aug, the figure for Mango will be more than Jack & Jones at nearly 500 and almost 400 thousands of pairs, respectively. The trend of Jack & Jones Co will decline dramatically between Jan at just below 500 thousands of pairs and Feb at about 200 thousands of pairs, followed by a gradual increase up to 300 in June thereafter; it will rise sharply ending at approximately 850 thousands of pairs in Dec.

Moving to projected market share, Jack & Jones firm will be more than Mango (will anticipate to be more than Mango) at 30 % and 20 %, respectively. In the end of next year, on the other hand, Jack & Jones Co will be around one third as many as Mango in both charts.

Overall, Jack & Jones Co predict to be more than Mango in jeans sales over the timescale. (187)
