

Total questions in exam: 20 | Answered: 11

Question No. 12

How many basic types of cells?

- Two
- Four
- Six
- One

Total questions in exam: 20 | Answered: 15

Question No. 16

..... Is a lipid that consists of four fused carbon rings?

- Triglyceride
- Phospholipid
- Maltose
- Cholesterol

Question No. 13

Protists are belonging to.....

- Domain Archaea
- Domain Eukarya
- Kingdom Animalia
- Domain Bacteria

Total questions in exam: 20 | Answered: 12

Question No. 13

The Population consists of different

- Biospheres
- Domains
- Communities
- Organisms

Protists are a collection of MOSTLY organisms

- Unicellular**
- Multi-cellular**
- Fungus**
- Bacteria**

Question No. 17

The simplest organic compound is

- Polysaccharides
- Methane
- Lipids
- Ethan

Question No. 18

Which order shows a increasing biological level of organization

- Atoms, Molecules, Cells, Tissues
- Organs, Tissues, Cells, Organ systems
- Organ systems, Organism, Organs, Tissues
- Tissues, Organ systems, Cells, Organs

Which carbohydrate protects insects?

- Starch
- Chitin
- Glycogen
- Cellulose

Question No. 18

..... are molecules that has the same formula but differ in structural arrangements.

- Isomers
- Shapes
- Polymers
- Skeletons

Proteins consists of subunits called.....

- Amino acids
- Triglycerides
- Nucleotides
- Fatty acid

Question No. 10

Protists are a collection of MOSTLY *unicellular* organisms

- Unicellular
- Bacteria
- Fungus
- Multi-cellular

Monomers forming DNA are called.....

- Nitrogen bases
- Sugars
- Amino acids
- Nucleotides

Question No. 17

A poly-unsaturated fat has

- Fatty acid with single double bond
- Fatty acid with several double bonds
- Glycerol with no double bond
- Fatty acid with no double bonds

Question No. 19

Sucrose and Lactose are examples of :

- Polysaccharides
- Dipeptides
- Disaccharides
- Monosaccharides

Question No. 18

Choose the CORRECT ORDER (1-5) of decreasing complexity in organization level

- (1) cells, (2) organ systems, (3) tissues, (4) organs, (5) organism
- (1) tissues, (2) organ systems, (3) cells, (4) organs, (5) organism
- (1) organism, (2) organ systems, (3) organs, (4) tissues, (5) cells
- (1) tissues, (2) organs, (3) organ systems, (4) cells, (5) organism

Total questions in exam: 20 | Answered: 18

Question No. 19

.... Results from two or more polypeptide chains joining together.

- Tertiary structure of a protein
- Quaternary structure of a protein
- Secondary structure of a protein
- Primary structure of a protein

Sucrose and Lactose are examples of :

- Polysaccharides**
- Dipeptides**
- Disaccharides**
- Monosaccharides**

Question No. 18

Amino acids contains two functional groups,

- Hydroxyl + Carboxyl
- Amino + Hydroxyl
- Methyl + Amino
- Amino + Carboxyl

Question No. 18

Choose the CORRECT ORDER (1-5) of decreasing complexity in organization level

- (1) cells, (2) organ systems, (3) tissues, (4) organs, (5) organism
- (1) tissues, (2) organ systems, (3) cells, (4) organs, (5) organism
- (1) organism, (2) organ systems, (3) organs, (4) tissues, (5) cells
- (1) tissues, (2) organs, (3) organ systems, (4) cells, (5) organism

In the body, carbohydrates give about _____ the energy as fats

- twice
- equal
- no answer is correct
- half

Question No. 14

Molecules that can interact with water are called.....

- Hydrophobic
- Hydrolysis
- Hydrocarbons
- Hydrophilic

Question No. 19

A Results from two or more polypeptide chains joining together.

- Tertiary structure of a protein
- Quaternary structure of a protein
- Secondary structure of a protein
- Primary structure of a protein

Which of the following is NOT a characteristic of all living things?

- Living things respond to the environment**
- Living things reproduce**
- Living things can carry out photosynthesis**
- Living things grow and develop**

Question No. 14

Choose the CORRECT ORDER (1-5) of decreasing complexity in organization level

- (1) cells, (2) organ systems, (3) tissues, (4) organs, (5) organism
- (1) organism, (2) organ systems, (3) organs, (4) tissues, (5) cells
- (1) tissues, (2) organ systems, (3) cells, (4) organs, (5) organism
- (1) tissues, (2) organs, (3) organ systems, (4) cells, (5) organism

In the body, carbohydrates give about _____ the energy as fats

no answer is correct

twice

equal

half

Cells come together to form

Molecule

Organ

Tissue

Atoms

..... Is an example of a membrane-bound structure *inside a cell*?

- organ
- organ system
- molecule
- nucleus
