To the Editor:

1 Why do our children have 12 weeks of summer vacation? We have to change the school schedule. Saudi students lose between two and three months of learning during their summer vacations. This is not necessary. Away from school for so many weeks, students forget what they learned. Experts say that students lose math skills and reading skills. At the beginning of school in September, teachers need to review last year's studies for the first four to six weeks of school. This is not a good use of classroom time.

2 Summer vacations are not great opportunities for learning. Unfortunately, most fathers cannot be with their kids during the long summer months. Some families can pay for summer camps, but many of them cannot. Most children stay home and watch TV. They are bored. Most children do not learn skills during the summer.

To the Editor:

4 I don't think we should reduce vacation. I feel it is important for students to take a good vacation. A long academic year of hard work can be difficult and can cause stress. Also, I believe people everywhere, not just in school, need experiences. Children need experience in the world.

5 Summer vacation is a great opportunity. Kids can discover the world outside school. They can learn to do things they can't learn in a classroom. They can learn to swim and ride bikes. They can travel to summer camps. They can get experience or help people in the community. Basically, they can get more experience in the world.

6 I am against a longer school year. I think summer vacations give families a chance to relax. During the school year, everyone is busy. During summer vacations, we can relax. We take time to do things together. Vacations are good for families.
