

MORPHOLOGY **الصرف**

Morphology is the study of word formation, of the structure of words.

دراسة تكوين و تركيب الكلمة .

:The **meaningful parts** into which words can be divided e.g., boldest can be divided into bold+est--are **called** the **morphemes** of the language.

These are considered the **basic units** of meaning in a particular language.

الوحدات الصغيرة ذات المعنى من الكلمة الواحدة تسمى المورفيم

Words that have **meaning by themselves**—boy, food, door—are called **lexical morphemes**.

الكلمات التي تحمل معنى لوحدها ؛ تسمى كلمات معجمية .

Those words that **function** to specify the relationship between one lexical morpheme and another—words like at, in, on, -ed, -s—are called **grammatical morphemes**.

الكلمات التي تربط بين كلمه معجميه و أخرى تسمى كلمات نحويه.

Those morphemes that can **stand alone** as words are called **free morphemes** (e.g., boy, food, in, on).

الكلمات المعجمية التي تحمل معنى بنفسها تسمى : كلمات مطلقة .

The morphemes that occur only in **combination** are called **bound morphemes** (e.g., -ed, -s, -ing).

الكلمات التي لا تأتي الا مجتمعه تسمى : كلمات مقيدة .

::**Bound grammatical morphemes** can be further divided into **two types inflectional morphemes** (e.g., -s, -est, -ing) and **derivational morphemes** (e.g., -ful, -like, -ly, un-, dis-).

الكلمات المقيدة تقسم الى:

كلمات تصريفية

و كلمات اشتقاقية

Inflectional Affixes	Derivational Affixes
All are suffixes	May be either suffixes or prefixes
Have a wide range of application. E.g. most English nouns can be made plural, with {PLU}	May have a wide or narrow range
All native to English (since Old English was spoken around 500-1000 AD)	Many were adopted from Latin, Greek, or other languages. (Though others, especially the suffixes, are native, including {ful}, {like}, {ly}, and {AG})

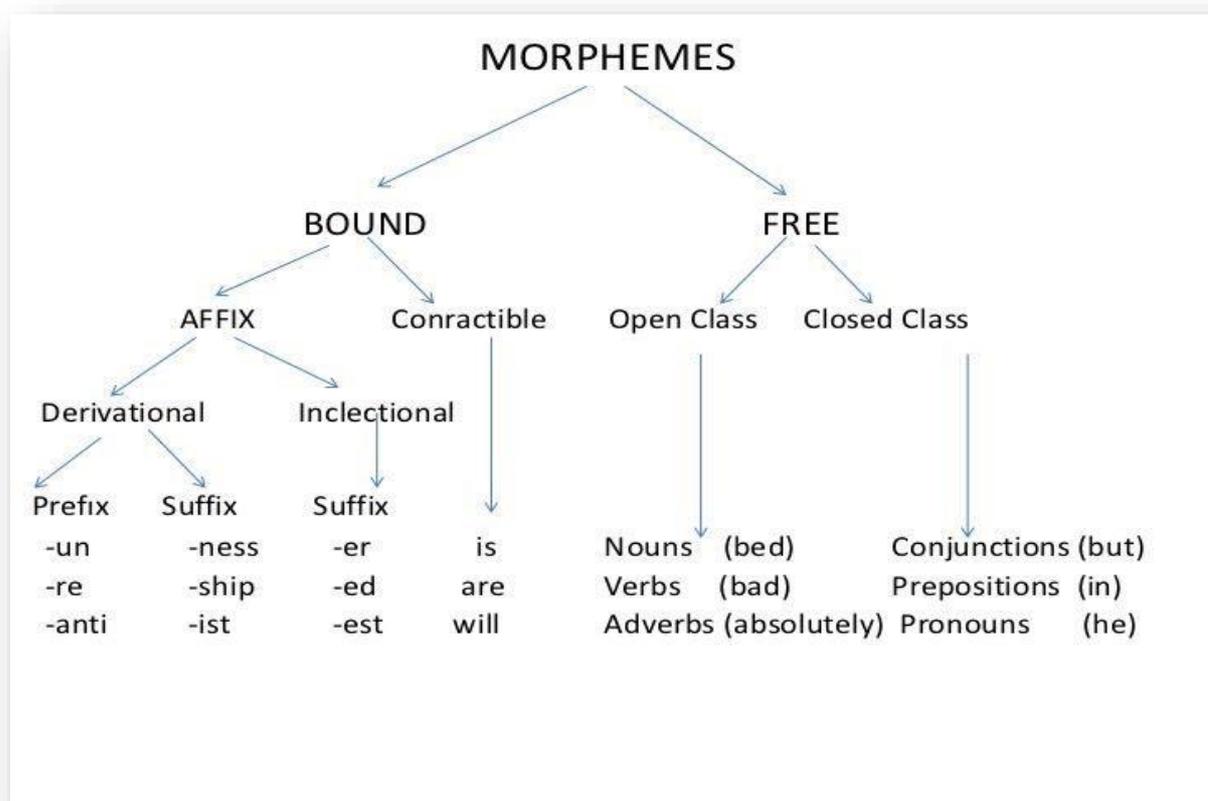

Inflectional Affixes

English has only eight inflectional affixes:

{PLU} = plural	Noun	-s	<i>boys</i>
{POSS} = possessive	Noun	's	<i>boy's</i>
{COMP} = comparative	Adj	-er	<i>older</i>
{SUP} = superlative	Adj	-est	<i>oldest</i>
{PRES} = present	Verb	-s	<i>walks</i>
{PAST} past	Verb	-ed	<i>walked</i>
{PAST PART} = past participle	Verb	-en	<i>driven</i>
{PRES PART} = present participle	Verb	-ing	<i>driving</i>

Notice that, as noted above, even irregular forms can be represented morphologically using these morphemes. E.g. the irregular plural *sheep* is written as {sheep} + {PLU}, even though the typically form of {PLU} is not used here.

Similarly, *better* = {good} + {COMP}; *drove* = {drive} + {PAST}.

Morphs and Allomorphs

Morphs : The actual forms used to realize morphemes.

Ex. cats => consists of two morphs

An inflectional morpheme (-s)

A lexical morpheme (cat)

توضيح: المورف هو الوحدة الصغيرة ذات المعنى سواء لغويا او نحويا.

Allomorphs : The actual forms of the morphs which result from the single morpheme " plural " turn out to be different. They are all allomorphs of the one morpheme.

Ex. sheep (s) => sheep (p)

Sheep (zero morpheme)

- **zero morpheme is one allomorph of plural.**

Quiz

1. What is morphology?

- (A) The study of the rules governing the sounds that form words
- (B) The study of the rules governing sentence formation.
- (C) The study of the rules governing word formation**

2-Which best describes the English language?

- (A) English has complex morphology and less rigid syntax.
- (B) English has less complex morphology but more rigid syntax:**
- (C) English has complex morphology and rigid syntax.

3-Which sentence describes inflectional morphology?

- (A) Adding a morpheme to produce a new word but the same lexeme.**
- (B) Adding a morpheme to produce a new word and different lexeme.
- (C) Adding a morpheme to produce the same word but different

4-Which sentence describes derivational morphology?

- (A) Adding a morpheme to produce a new word but the same lexeme.
- (B) Adding a morpheme to produce a new word and a different lexeme**
- (C) Adding a morpheme to produce the same word but a different lexeme
