Reading 1.1: Read the article and choose the best answer for each item: a, b, c, or d.

The Benefits of Advertising

¹How often do we hear comments such as these: “advertising,” or “There’s too much advertising world!” In the 21st century, it seems that advertising is everywhere we look. We see it along highways, in buses, even in taxicabs, as well as on the Internet and TV. It’s hard to escape advertising. But do we really need it? Actually, when you think about it, advertising provides us with quite a few benefits.

²First, advertising gives us information that we need. For instance, if you want to buy a new appliance or a new car, you can look for the best “deals” in ads that appear in newspapers, in magazines, on television, or even on radio. These ads give you details about the products.

The Benefits of Advertising

As we hear comments such as these: "There's too much advertising in the 21st century, it seems that advertising is everywhere we look. We see it along highways, in taxis, in taxicabs, as well as on the Internet and in our homes. It's hard to escape advertising. But do we really need it? When you think about it, advertising provides a few benefits.

Advertising gives us information that we need. If you want to buy a new appliance or a new car, you can look for the best "deals" in ads that appear in magazines, on television, or even in newspapers. Ads give you details about the products.

1 2 3 4

According to the article, which of the following statements is an OPINION?

- Many presenters, such as newsreaders, get their starts from appearing in commercials.
- In the 21st century, it seems that advertising is everywhere we look.
- Companies pay as much as a million dollars for 60 seconds of advertising time during this event.
- Besides providing information, advertising also supports the entertainment industry, including television and radio.

Question 3 :

How often does the Super Bowl event happen?

- every hundred days
- every month
- every year
- every 60 seconds

Question 4 :

According to the article, which of the following is TRUE?

- Whenever you open a page in Google or access an online newspaper, such as the New York Times, there are dozens of ads.
- It may be interesting to sit through commercials during your favorite TV show, but the advertisers have paid for its production.
- For instance, if you want to buy a new appliance or a new car, you can look for the best "deals" in ads that appear in clothing catalogs.
- From clothing designers and photographers to paper company workers and store employees—hundreds of people worked to help produce that catalog.

Reading 1.2: Read the article and choose the best answer for each item: a, b, c, or d.

Are Tablets the Answer?

¹Talal and his classmates sit next to each other in an eighth-grade science class. They are not listening to their teachers or penciling down notes in their science journals. Some students are watching videos about cells on YouTube. Others are using an app to design experiments. When they need help, they type a quick message to their teacher, who monitors them from his computer. You would think this is a classroom in the USA or the UK, but it is actually in Saudi Arabia!

²In the Middle East, tablet computers are revolutionizing education. Today, more schools are using tablets instead of paper or books. Governments predict the best jobs of the future will require students to have strong computer skills. They believe that tablet-based learning will better prepare them for the future.

Question 4 :

Which country has developed the most advanced tablet-based learning?

- a. USA
- b. UK

need help, they type a quick message to their teacher who monitors them from his computer. You would think this is a classroom in the USA or the UK, but it is all in Saudi Arabia!

²In the Middle East, tablet computers are revolutionizing education. Today, more schools are using tablets instead of paper or books. Governments predict the best jobs will require students to have strong computer skills. Therefore, tablet-based learning will better prepare them for the future.

³Saudi Arabia's support for school tablets only began recently. In 2014, the Ministry of Education started providing Internet access, computers, and tablets in hundreds of classrooms. The tablets connect students to an enormous amount of new, digital content, including e-books, videos, and classroom apps. Eventually, all schools will have tablets. But will the experiment work?

⁴Right now, it is too early to know. However, the answer could be next door. In Qatar, thousands of public school students are already using tablets. According to the government, every student will have one by 2018. The country believes tablet-based learning is the answer for the future. And so far, early results have been positive.

⁵Hamed Ibrahim works for the Ministry of Education in Saudi Arabia.

HP LE1901w

They type a quick message to their teacher, who sends them from his computer. You would think that this is a classroom in the USA or the UK, but it is actually in Saudi Arabia!

In the Middle East, tablet computers are revolutionizing education. Today, more schools are using tablets instead of books. Governments predict the best jobs will be for students who have strong computer skills. Their hope is that digital learning will better prepare them for this new world.

Qatar's support for school tablets only began in 2014, but the Ministry of Education started to put computers, tablets, and tablets in hundreds of schools. The tablets connect students to an enormous amount of digital content, including e-books, online videos, and classroom apps. Eventually, all schools could have tablets. But will the experiment work?

It is too early to know. However, the answer is just around the next door. In Qatar, thousands of public schools are already using tablets. According to the Ministry of Education, every student will have one by 2018. The Ministry believes that tablet-based learning is the answer to the challenges of the future. So far, early results have been positive.

Abdullah bin Mubarak Al Thumairy, Minister of Education in Qatar

Save & Next حفظ والتالي

According to the article,

- Still, no technology is being used in schools.
- This can put their students at a disadvantage.
- Right now, it is too expensive.
- It is investing millions of dollars.

Question 2 :

According to the article,

- Schools will have to invest more money.
- Finally, with special training, teachers can use them for presentation and sharing.
- In Qatar, thousands of schools are using tablets.
- In 2014, the Ministry of Education started to put computers, tablets, and tablets in hundreds of schools.

Question 3 :

The underlined reference in the text refers to the following?

- iPads
- students
- teachers
- cells

Question 4 :

Which country has decided to use tablets in schools?

- USA
- UK

P LE1901w

country believes tablet-based learning is the answer for the future. And so far, early results have been positive.

⁵Hamad Ibrahim works for the Ministry of Education in Qatar. He says students are doing better with technology because the learning is interactive and dynamic. In a history class, for example, students can use a tablet to discover and “rebuild” an ancient city. To start, they take a video tour of the ancient city of Babylon. Then, using tablet technology, they can “walk through” it as if they were really there. Next, they use an app to design their own city. Finally, with special software, they turn their designs into a presentation and share them instantly on their screens. The students use creativity to solve their own problems. Experts believe this motivates students to learn.

⁶Still, no technology is perfect. Many Qatari students often expect to complete tablet assignments at home. One problem is that not all families have Internet access. Other times, Internet connections are slow or not working. This can put their children at a disadvantage.

⁷Back in Saudi Arabia, the government is trying to prepare for this. It is investing millions into fast Internet in schools. This is part of the country’s decision to develop a “knowledge economy.” It wants to prepare school children for the future.

حفظ و التالى Save & Next

Question 2
According to the passage...

- Still, no technology is perfect.
- This can put their children at a disadvantage.
- Right now, early results have been positive.
- It is investing millions into fast Internet in schools.

Question 3
According to the passage...

- Schools in Saudi Arabia are investing millions into fast Internet.
- Finally, with special software, they turn their designs into a presentation and share them instantly on their screens.
- In Qatar, students use creativity to solve their own problems.
- In 2014, the government in Saudi Arabia decided to develop a “knowledge economy.”

Question 3
The underlined word “disadvantage” in the passage refers to...

- iPads
- students
- teachers
- cells

Question 4 :
Which country is mentioned in the passage?

- USA
- UK

believes tablet-based learning is the answer to the problem so far, early results have been positive.

Mohammed bin Rashid Al Maktoum works for the Ministry of Education in Dubai. He says students are doing better with tablets because the learning is interactive and dynamic. In a class, for example, students can use apps to virtually "rebuild" an ancient city. To start, they may take a virtual tour of the ancient city of Babylon. With virtual reality technology, they can "walk through" it as if they were there. Next, they use an app to design their own virtual city. Finally, with special software, they turn their designs into a presentation and share them instantly on social media. The students use creativity to solve their problems. Experts believe this motivates students to learn.

While tablet technology is perfect, many Qatari students are still not able to complete tablet assignments at home. The problem is that not all families have Internet access. In some areas, Internet connections are slow or stop working. This can put their children at a disadvantage.

In Saudi Arabia, the government is trying to prepare for the future by investing millions into fast Internet for schools. This is part of the country's decision to develop a modern economy. It wants to prepare school children for the future.

designs into a presentation and share them instantly on their screens. The students use creativity to solve their own problems. Experts believe this motivates students to learn.

⁶Still, no technology is perfect. Many Qatari students are often expected to complete tablet assignments at home. One problem is that not all families have Internet access. Other times, Internet connections are slow or not working. This can put their children at a disadvantage.

⁷Back in Saudi Arabia, the government is trying to prepare for this. It is investing millions into fast Internet in schools. This is part of the country's decision to develop a "knowledge economy." It wants to prepare school children for new jobs in science and technology. Putting tablets in children's hands and faster Internet in everyone's home is one step towards this goal.

⁸However, if all Saudi students do have tablets on their desks, success will require more than the fastest Internet. Teachers are going to need training. Schools will have to make sure children access content safely. And parents must learn to adapt to technology they never had in Saudi Arabia. But if Saudi Arabia gets it all right, it will be the leader in tablet education. And the children will be the new leaders of the country's knowledge economy.

Question 1 :

According to the passage,

- Still, no technology is perfect.
- This can put their children at a disadvantage.
- Right now, no technology is perfect.
- It is investing millions into fast Internet in schools.

Question 2 :

According to the passage,

- Schools will invest millions into fast Internet in schools.
- Finally, with the investment in fast Internet, presentation will be easier.
- In Qatar, the government is trying to prepare school children for new jobs in science and technology.
- In 2014, the government invested millions into fast Internet in schools.

Question 3 :

The underlined word in the passage refers to the following?

- iPads
- students
- teachers
- cells

Question 4 :

Which country has the fastest Internet in schools?

- USA
- UK

technology is perfect. Many Qatari students are expected to complete tablet assignments at home. The problem is that not all families have Internet access. Sometimes, Internet connections are slow or stop. This can put their children at a disadvantage.

Saudi Arabia, the government is trying to prepare. It is investing millions into fast Internet for schools. This is part of the country's decision to develop a large economy." It wants to prepare school children for jobs in science and technology. Putting tablets in children's hands and faster Internet in everyone's home is towards this goal.

Even if all Saudi students do have tablets one day, they will require more than the fastest Internet. Children are going to need training. Schools will have to ensure children access content safely. And parents will need to adapt to technology they never had in school. If Saudi Arabia gets it all right, it will be the next step in tablet education. And the children will be the leaders of the country's knowledge economy.

Question No. 2

Exercise 1.2: Read the article and choose the best answer for each question (a, b, c, or d).

Are Tablets the Answer?

Abdulaziz and his classmates sit next to each other in a 5th-grade science class. They are not listening to their teachers or penciling down notes in their science journals. Some students are watching videos about cells on YouTube. Others are using an app to design experiments. When they need help, they type a quick message to their teacher, who monitors them from his computer. You would think this is a classroom in the USA or the UK, but it is a classroom in Saudi Arabia!

In the Middle East, tablet computers are revolutionizing education. Today, more schools are using tablets instead of paper or books. Governments predict the best jobs of the future require students to have strong computer skills. They believe that tablet-based learning will better prepare them for the future.

Question No. 1

Read the introductory paragraph to an opinion essay below. Which of the following is the best thesis statement for the essay?

With new technology, advertising can be deceptive. For example, many beauty ads show women with perfect skin and hair. In reality, their photos have been "touched up" by computer software programs. Men, too, are shown as very muscular and strong, when the reality may be quite different. Men and women both age naturally, but advertisements show a different kind of person—one who never gets old.

- With new technology, advertising can be deceptive. For example, many beauty ads show women with perfect skin and hair.
- I think advertising should show people of different ages, shapes, and sizes, not just young people.
- I think computer software programs are very innovative.
- I think changing the way someone looks in a photo is outdated.

Are Tablets the Answer?

¹Talal and his classmates sit next to each other in an eighth-grade science class. They are not listening to their teachers or penciling down notes in their science journals. Some students are watching videos about cells on iPads. Others are using an app to design experiments. When they need help, they type a quick message to their teacher, who monitors them from his computer. Question No. 2

They would not have the money to continue.

6 There has always been a "good" side to advertising in the form of public service announcements (PSAs). The advertisements that provide people with information on issues like diseases or medical problems, as well as health and safety. The commercials are often very clear and informative. They provide viewers with the information they need in a memorable way. Viewers and companies pay for the PSAs, and advertising agencies make donations of their time and expertise to produce them.

7 It would be a much duller, certainly less colorful world without advertising. Think of all of the ways that advertising improves our world. The next time you look at that clothing catalog, think of all of the creativity and effort that went into making it. From clothing designers and photographers to paper company workers and employees—thousands of people worked to help produce that catalog. And when you watch your favorite TV commercial, remember that the commercials were partly responsible for what you've just watched and enjoyed. We may wish that commercials and advertisements weren't necessary for the most part, we are all content to have them as part of our lives.

TASTE

Knowing Your Tastes

Likes and Dislikes

Some people love spicy food and others hate it. Why do so many people dislike broccoli? Why do some people want sweets all the time? Human taste is a complex mix of liking or disliking something. The kind of taste you have can affect your food choices—and your health.

How the Tongue Works

The human tongue is made up of a group of muscles and taste buds that work together to recognize taste. An adult tongue has 10,000 taste buds, which are located on the tongue. Tiny hairs on the end of the tongue tell us whether food is sweet, sour, bitter, or salty.

Diets

¹ Most people know the importance of having a balanced diet. Nutritionists around the world remind us often that this is very important. A balanced diet usually means eating more fruits, vegetables, and grains, and consuming fewer foods high in fat, sugar, and cholesterol. However, people's culture affects what they try to eat to balance their diet. Being healthy and eating a balanced diet doesn't mean that we all have to eat the same things. Below are some of the things that people eat in different countries and cultures in search of a balanced diet.

Risks

Every year in Pamplona, Spain, hundreds of people run alongside 1,300-pound (600-kilo) bulls, just for the fun of it. Yet this does not stop people from participating in the

What is it that drives some people to embrace extreme risks while the rest of us run to the safety of the sidelines? For the U.S. Ski and Snowboard Association, it's not everyone who has the mental character to excel in their pursuits. He notes that most of us reach a point where our appetite for extreme risk and, as a result,

Question 1:

According to the article, which of the following sentences is a FACT?

- And every year at least a few of these people are injured, some seriously.
- The high element of risk makes you feel alive, tests what you are made of, and how far you can take yourself.
- Our perceived risk of the sport leaves the majority of us at the bottom of the mountain.
- One thing is for sure, everyone can overcome their perceived fear of risk.

Question 2:

According to the article, which of the following sentences is FALSE?

- Psychologists note that some people seem to have a strong craving for adrenaline rushes as a thrill-seeking behavior or personality trait.
- He worked with a group climbing Everest with oxygen, which to him was the riskiest thing anyone could do.
- Mountaineer Al Read has logged many notable first ascents over the course of his climbing career.
- In addition to not being afraid of risks, certain people may perceive risk differently from others.

Question 3:

The underlined referent "others" in paragraph 2 refers to which of the following?

- people with no limits for extreme risks
- the top U.S. downhill ski racers

Perfect Food Advertisements

Food that you see in advertisements looks perfectly perfect, thanks to the work of a food stylist. Food stylists are make-up artists. It's their job to make you believe the food you see in advertisements is great. Many food businesses, such as restaurants and food stylists, hire someone called a food stylist to help them sell. The reason the "real" food is different is because the food stylist uses "tricks" to make the food look better and more

Question 1:
Which of the following notes are for paragraph 4?

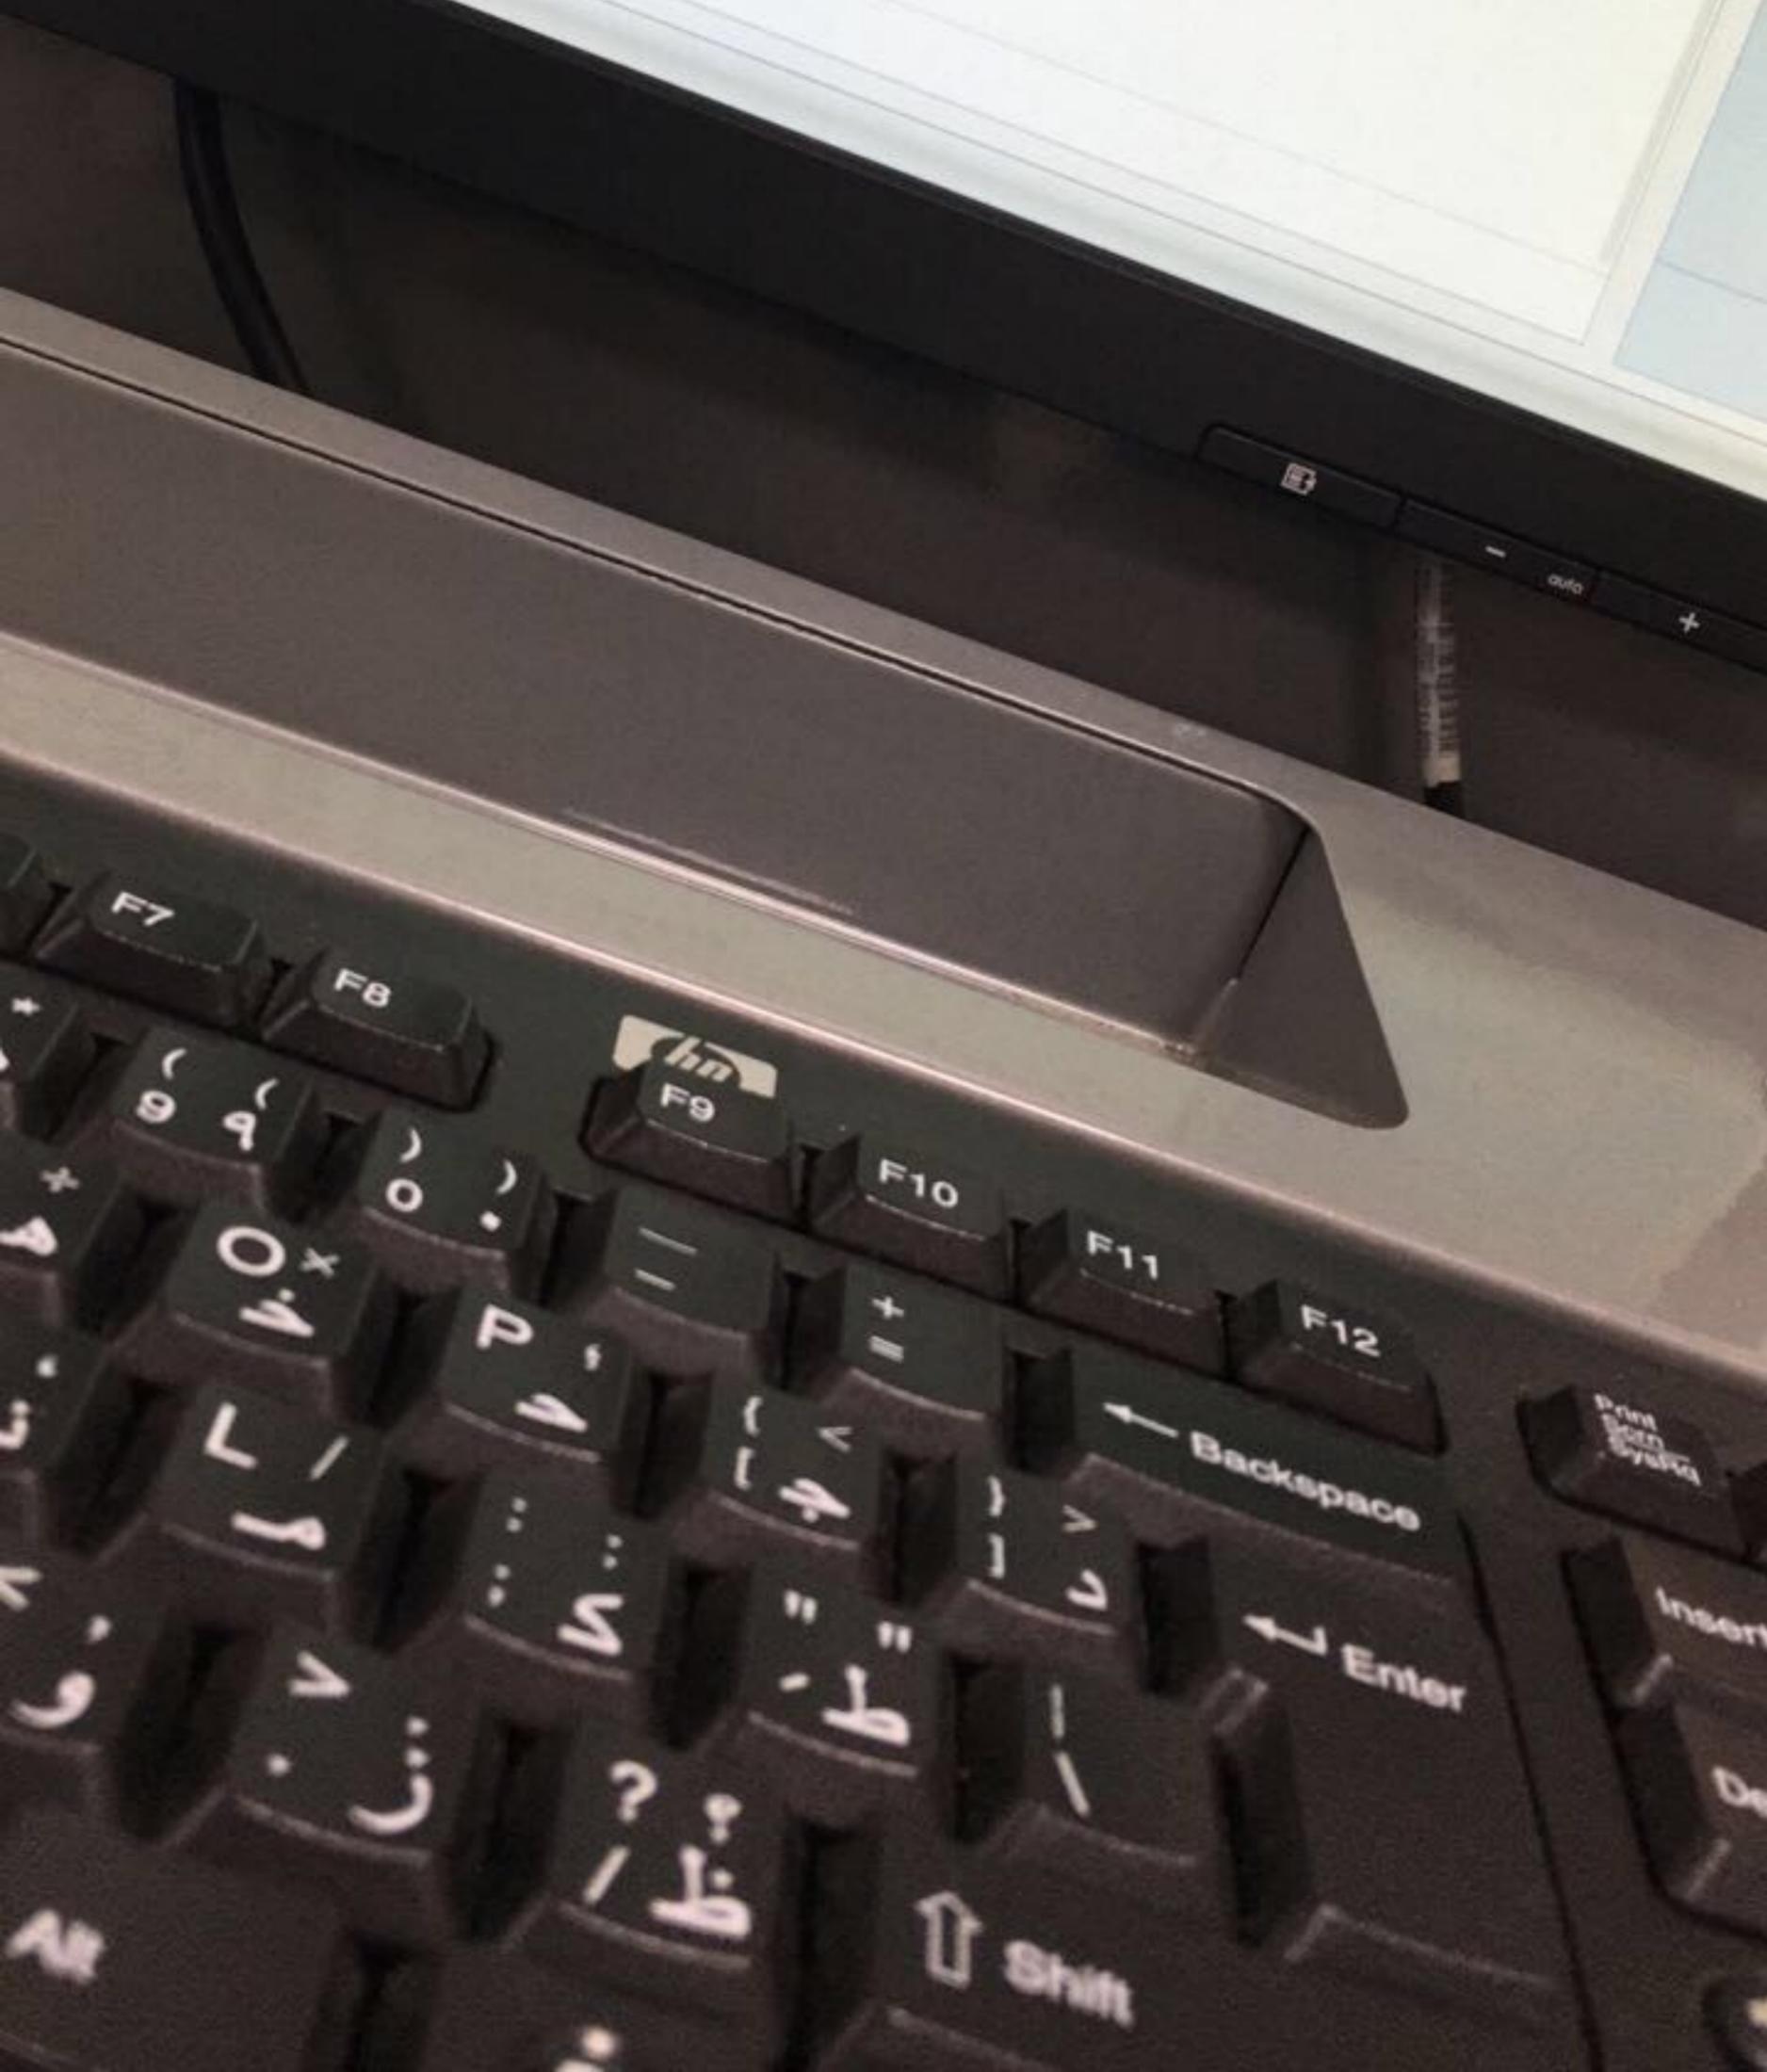

- deceptive tricks, sewn, bird painted to look cooked
- deceptive tricks, painted brown to look yummy
- deceptive tricks, food not edible
- deceptive tricks, food appears better than actually looks

Question 2:
According to the article, which of the following sentences is an OPINION?

- Finally, a perfect piece of lettuce, without any holes or brown spots is chosen and sprayed with glycerin and water, so that it looks fresh.
- They believe that consumers want to see food at its best, and they feel that it is their job to make the food look good.
- Many food businesses, such as restaurants and food companies, hire someone called a food stylist to help photograph the foods that they sell.
- In the U.S. there is a law that if a company is advertising a food, the real food must be used in the photograph.

Question 3:
What do photographers use to glue on sesame seeds?

- blow torches
- toothpicks
- tweezers

Diets

Most people know the importance of having a balanced diet. Nutritionists around the world remind us often that this is very important. A balanced diet usually means eating more fruits, vegetables, and grains, and consuming fewer foods high in fat, sugar, and cholesterol. However, people's culture affects what they try to eat to balance their diet. Being healthy and eating a balanced diet doesn't mean that we all have to eat the same things. Below are some of the things that people eat in different countries and cultures in search of a balanced diet.

0000

Question 1: Which of the following is NOT true for paragraph 1?

- A) Balanced diet means different things in different cultures

Question No. 1

Read the introductory paragraph to an opinion essay below. Which of the following is the best thesis statement for the essay?

I was watching TV last night and realized something about my life: I'm missing a lot of things. When I saw a commercial for a new sports car, I realized I don't have the most modern car. An ad for flat-screen TVs reminded me that my television is eight years old. And finally, the travel commercial reminded me that I don't have the money to travel to exotic places and stay in world famous resorts. So, in the end, all of these things make me feel like a failure. This is not a reason why I watch TV.

- Advertising on TV should provide us with details about all the latest products.
- Advertising on TV should entertain us.
- Advertising on TV should make us miss a lot of things.
- Advertising on TV should not make us feel like we are not successful.

The Climb of My Life

At the age of 28, Shelly Pearson developed a disease. After three years of treatment, she received a heart transplant. Ten months later, she climbed to the top of Half Dome Mountain in Yosemite National Park, and became the first heart transplant recipient to do so.

Mountains can be seen as a series of difficulties that need to be overcome. To me, a mountain is a challenge, with body, spirit, and mind all working together. Being sick is a challenge, too. It involves bravely facing the unknown, and it requires well-defined goals and discipline. Of course, I'd rather the mountain be a mental challenge than physical challenges to

1 2 3 4

Question 1 :

Which of the following notes are for paragraph 4?

- Shelly developed heart disease, climbed Half Dome Mountain
- Final half mile not difficult, reached top of Half Dome
- 1996, hike trail to Half Dome, slippery rocks
- Hike Half Dome, distinctive shape

Question 2 :

According to the article, which of the following sentences is a FACT?

- Like life, mountains can be seen as a series of difficulties that you need to overcome.
- If it were whole, it would lose its uniqueness.
- Ten months after my transplant, I had reached the top of Half Dome!
- To me, a mountain is the ultimate challenge, with body, spirit, and mind all having to work together.

Question 3 :

What is available to help protect the climbers from the "death grip"?

- steel cables
- work gloves
- wooden planks
- a handrail

Question 4 :

According to the article, which of the following sentences is FALSE?

- In August of 1996, just ten years after my heart replacement, my husband Craig and I began to hike the trail leading to Half Dome.
- Just because I wasn't perfect didn't mean I couldn't stand as tall

TASTE

Knowing Your Tastes

Likes and Dislikes

For some people love spicy food and others hate it. Why do so many people dislike broccoli? Why do some people want sweets all the time? Human taste is a complex process of liking or disliking something. The kind of taste you have can affect your food choices—and your health.

How the Tongue Works

The human tongue is made up of a group of muscles and taste buds that work together to recognize taste. An adult tongue has 10,000 taste buds, which are located on the tongue. Tiny hairs on the end of the tongue tell us whether food is sweet, sour, bitter, or salty.
