مدونة المناهج السعودية eduschool40.blog

- * Hackers → white hat «ethical hacker» .
- ↳ Grey hat
- ↳ Black hat.

* Trojan horse → installs Backdoor / Rookits on your computer .

* Backdoor → makes your computer a Zombie

* Zombie → is usually used to make Dos

* Dos :- can be done ~~from~~ from more than one Zombie and it is called DDoS

* DDoS :- are Coordinated by Botnet.

* Hackers gain a computer access by → Direct access
↳ Indirect access

Exploit kit

by exploiting known vulnerabilities in OS and browsers

Internet Connection

Via ~~open~~ opened logical port

* Virus type → Boot sector

↳ logical bombs and time bombs ~ ~~الوقت في وقتها~~

↳ Worms

↳ Script and Macro

↳ الفرق والتعاريف . الخ

↳ E-mail

↳ Encryption

* How viruses avoid detection

↳ Polymorphic

↳ Multipritite

↳ Stealth

* Online threats

- ↳ Malware
 - ↳ Virus and worms
 - ↳ Adware
 - ↳ Spyware
- ↳ Spam and spam → Tap the phone
- ↳ Cookies
- ↳ Social engineering
 - ↳ types
 - ↳ Phishing
 - ↳ Pharming
 - ↳ Scarware
 - ↳ How it works → pre-texting

* Protecting your Digital property

- 1) Restricting Access to your digital Assets
- 2) Keeping your Data safe.
- 3) Protecting your physical computing Assets.

* [1] Restricting Access to your digital Assets

- ↳ Firewall → preventing hackers from access your computer and information through the Internet by firewall
- ↳ preventing virus infections
 - ↳ Antivirus software
 - ↳ system updates
- ↳ protecting your digital information by [authentication]
 - ↳ Passwords
 - ↳ Biometrics.

↳ Anonymous web Surfing

- ↳ privacy tools
 - ↳ Torkey
 - ↳ Linux based on flash
 - ↳ VPN

Firewalls

types

Hardware

Software

استعملوا لانتين فنتس بوقت حاري
بالعكس كورين الحايقنيزر

Come with OS

security suites

استعملوا وقت الحايقنيزر لانتين

How it protect you?

↳ Blocks access to logical ports

↳ Packet filtering

↳ logical ports blocking

↳ keeping your computer Network secure

↳ NAT

~~Physical~~

* How Antivirus works

↳ Detection → By virus signature

↳ stop virus ~~exe~~ execution → Quarantining.

↳ Deleting or repairing the infected files.

↳ Prevent future infection → Incubation.

* protecting your physical computing Assets

↳ عوامل بيئية

↳ كهرباء → Power surge

↳ الحرارة

1 / 1

Alarm Software

* Alarm → laptop

* Motion Alarm
* Alarmomatic
for iPad and iPhone

Encryption Software

* safe → iPad, iPhone
* mobile strong box
Android

* SensiGuard, safe house
laptops

تتبع الموقع

* LoJack, PC Phone Home
Mac phone home

* iHound

Android
ios

find my iPhone → ios
my Droid → Android

Software

[OS] → has three primary function.

- Types of operating system
- Single user - single task
 - single user - Multitask
 - Multi ^{user} ~~task~~ → Multitask → windows OS X

Device	OS type	
Machine with built-in computers	Real-time OS [RTOS] أنظمة مدمجة embedded system	* embedded system require minimal user interaction * يوجد نظام تجاري يباع لانتكس في شركة رقمية حسب ما يحتاج جهازها
Network devices → server → Super computer → Main frame	Multuser Operating System "Network os"	* windows servers * Linux * Unix * Latest version of windows and OSX used in homes and small network
smart phone	موبايل IOS	* IOS * Android * Windows مخبرات هذه أنظمة "جهازية السمارت فون" كلها في السلايد.

tablets

سماوات اسم محدود

- * iPad → IOS
- * Samsung galaxy tab
- * google nexus
- * kindle fire → android
- * windows 8 was released in 2012, before it microsoft didn't have a popular tablet OS.

Gaming console

- ↳ Xbox 360
- ↳ Wii
- ↳ Playstation
- ↳ iPad

* كل شئ في توي نظامها نفس سالفه لا مبدية كمبيوتر عثمان كل شركة
 كيفية تيرجك 4
 يتحكم النظام في اجهزة الادي والبرامج 6 ان

personal media player

personal computer

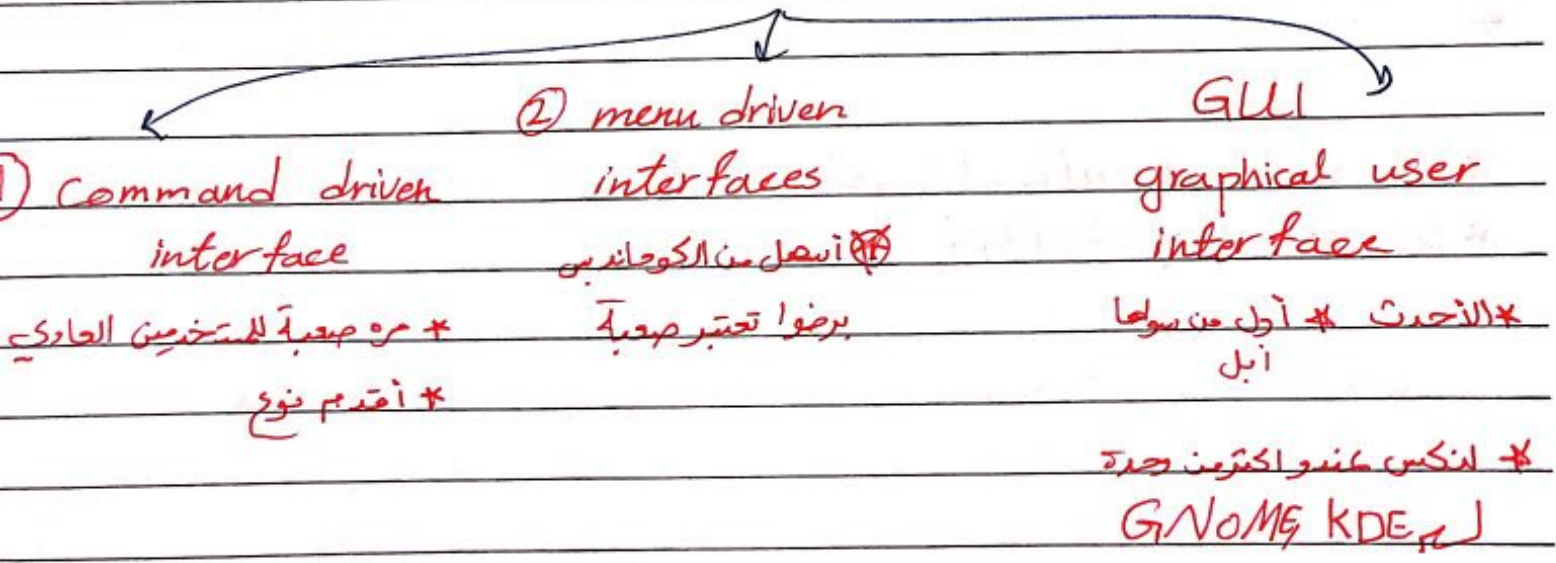

windows

OS X

Linux

مع جهازين وخصائص
 كل واحد

User Interfaces

* What OS does

- ↳ provides user interface
- ↳ Hardware Coordination → manage CPU
 - ↳ Memory uRam and storage devices
 - ↳ Hardware and peripheral device management mangment
- ↳ software application Coordination

آب بوی بوتینگ با، یس دلجی *

* Utility program

- ↳ windows Administration utilities
 - ↳ Disk clean up → make system faster then
 - ↳ Task manager → checks stopped programs and terminate
 - ↳ Disk Defragmentation → improve computer's performance
- ↳ file system Backup utilities
 - ↳ file history → Back up files
 - ↳ system restore → ~ ~ system → بر لوینسز
 - ↳ time machine → ~ ~ ~ → بی کالی
- ↳ Accessibility utilities
 - ↳ magnifier
 - ↳ Narrator
 - ↳ speech
 - ↳ one-screen key board
 - ↳ High contrast

Chapter One - Basic Computer Concepts

لازم التفریق :-

* Computer	* a programmable electronic device that can, input, process output, and store data.
* programmable	* a device can be instructed to perform a task or a function when fed with a program or software
* Data	* represents text, numbers, graphics, sounds, ... entered into the computer's memory during [input operation]
* information	Data has been [Processed] so it can be
* PC	* the OS → windows * less expensive * user interface * Application software * has a larger market among general users.
* Mac	* the OS → Mac * more expensive * user interface * Application software * popular with graphic design

They both Do the same functions

* information processing cycle

types of computer

types

- ↳ Desktop
