Read the following questions, and on the answer sheet, darken the number that matches the correct alternative.

Part One: Mark (T/True) for the true statements and (F/False) for the false ones. (1) point each. 1

() A drought is a shortage of food.	1
() Baharat is a mixture of spices.	2
() Light is a form of matter .	3
() On pH scale, soap has a pH value of 9.5	4
() Liquids have no fixed shape, and are picked up in a container.	5
() Dr. Edward Jenner has invented the vaccine.	6
() Round, square , straight and curved are verbs .	7
() Sound is created by something vibrating.	8
() Cooker that cooks things slowly is a microwave .	9
() Al-Khwarizmi is a scientist who invented the zero.	10
() If the weather is foggy, we can't see where we are going .	11
() Hertz is the number of sound waves per hour.	12
() Brine is a kind of sweetened water.	13
() Alkalis are bases that dissolve in an acid.	14
() The people who have nowhere to live are homeless.	15
() Concave lenses are thinner in the middle than at the edges .	16
() Suffixes are group of letters added before the stem.	17
() The word " combine" means " join "	18
() The word alkali is from Latin.	19
() It is a possible to crossbreed animals that are from different family.	20

)Part two: A) Read the following passage then choose the best answer to the questions below: (2.2

A bird's territory may be small or large. Some males protect only their nest and the area right around it, while others such as hawks, protect wider territories which include their hunting areas. Gulls, penguins, and other waterfowls nest in huge colonies, but even in the biggest colonies, each male and his mate have tiny territories of their own immediately around their nest. Males defend their territories chiefly against other males of the same species. In some cases, a warning call or a threatening pose may be the only defence that is needed, but in other cases, intruders may refuse to leave peacefully and a battle for the territory takes place.

According to the passage, what do some males protect? Their							21
eggs	4	feathers	3	claws	2	nest	1
Who defend their territories against other males ?							22
penguin's mate	4	males	3	intruders	2	mates	1
In some cases, bird's male has to to protect the nest .							23
battle	4	cry	3	surrender	2	sleep	1
Hawks protect							24
wider territories	4	small territories	3	narrower territories	2	old territories	1
How do birds defend their nest in some cases ?							25
escape	4	cry	3	stay still	2	warning call	1
How big is a bird's territory ? May be							26
only large	4	only small	3	only tiny	2	small or big	1
Birds defend their territories from other birds of							27
rare species	4	strange species	3	same species	2	different species	1
What are penguins and gulls ? They are							28
insects	4	birds	3	fish	2	animals	1
Waterfowls nest in							29
huge colonies	4	small colonies	3	tiny colonies	2	medium colonies	1
The underlined word <u>their</u> refers back to							30
1	territories	2	males	3	areas	4	nests
Choose the best alternative : (2) points each .3

Read the following questions, and on the answer sheet, darken the number that matches the correct alternative.

Part One: Mark (T/True) for the true statements and (F/False) for the false ones. (1) point each.1

() " examples " and "illustrations" are antonyms .	1
() " spare-time interests" means hope .	2
() Alkalis turn green litmus paper red.	3
() Smooth surfaces scatter light .	4
() Vibration is the source of light .	5
() Litmus is a vegetable dye .	6
() Ibn al-Nafis was a great scientist .	7
() Frogs and elephants are covered in skin.	8
() The dog, the wolf and the jackal are part of the dog family .	9
() Gases have a fixed shape.	10
() Acids corrode metals and rocks.	11
() The word " simmer " means fry gently.	12
() A plough is a tool used for breaking up the soil.	13
() Beak is the highest part to a mountain .	14
() A valley is flat land between two hills.	15
() Marketing is the science of selling .	16
() Light is a combination of particles and waves.	17
() "Watch carefully" means observe .	18
() Smallpox is a disease that is only found in cattle.	19
() The particles of solid can easily move.	20

Part two: A) Read the following passage then choose the best answer to the questions below: (2.2)

Bats are classified as mammals because they give birth rather than laying eggs. They sleep in the day and fly at night. They have long fingers and stretched wings. The bat's wing looks like the human hand. Almost 1000 bat kinds can be found worldwide. Bats can be found anywhere in the world except the polar regions and deserts. However, the number of some bats are dangerously low or in decline. About 70% of bats eat insects. There are also fruit-eating bats, and the blood-sucking bats of South America. Some bats have a strong sense of hearing, they emit sounds that reflect off objects in their path, called echoes. From echoes of the sounds they emit, bats can determine the size of objects, how far away they are and how fast they are flying, all in a split of a second .

Bats cannot be found in the						21	
forests	4	deserts	3	mountains	2	trees	1
Some bats have a strong sense of						22	
taste	4	smell	3	hearing	2	seeing	1
How many kinds of bats are found worldwide ?						23	
two thousand	4	one hundred	3	three thousand	2	one thousand	1
From echoes bats determine the ... smell .						24	
weigh of objects	4	colours of objects	3	shape of objects	2	size of objects	1
What does the bat's wing look like ?						25	
the human hand	4	the human face	3	the human finger	2	the human head	1
Why are bats classified as mammals ? Because they						26	
eat insects	4	give birth	3	eat eggs	2	lay eggs	1
About 70% of bats eat						27	
vegetables	4	fruits	3	trees	2	insects	1
Where do blood -sucking bats live ? In						28	
South America	4	North America	3	Asia	2	Africa	1
When do the bats fly ?						29	
in daylight	4	at noon	3	in the morning	2	at night	1
The underlined word they refers back to						30	
1	echoes	2	sounds	3	objects	4	bats

Choose the best alternative : (2) points each .3

Read the following questions, and on the answer sheet, darken the number that matches the correct alternative.

Part One: Mark (T/True) for the true statements and (F/False) for the false ones. (1) point each.1

()	Headline is a group of words on the top of articles.	1
()	Ibn Al-Haytham was a famous scientist .	2
()	Vaccine is a Latin word that means cat.	3
()	Synonyms are words with opposite meanings.	4
()	Covid19 is a diseases.	5
()	Mystery is something that is possible to explain.	6
()	Hertz is the unit used for measuring the volume of sound.	7
()	A fault line is a place where two plates meet.	8
()	Ultrasonic are the frequencies which are lower than those that can be heard by people.	9
()	The acidity of solutions is tested by litmus.	10
()	Salt is produced when acids and bases react.	11
()	The forms of matter are called states.	12
()	Lenses are specially- shaped pieces of glass that reflect light.	13
()	Shortage of food is called drought .	14
()	Coastline is a place or a line between sea and land.	15
()	Sound acts like a stream of particles.	16
()	Crossbreed animal means making new ones.	17
()	Kinetic theory has stated that matter is made up of particles.	18
()	Suffix is a group of letters that are added to the beginning of a word.	19
()	Igloo is a house made of sand.	20

Part two: A) Read the following passage then choose the best answer to the questions below: (2.2

~~Energy is the power derived by using chemical or physical resource and it is the strength and vitality required for sustained mental or physical activity. People and animals get energy from eating food, the plants receive their energy from the sun and in turn people eat the plants and animals that have also eaten plants all made possible by the food chain. Sources of energy have been divided into two types, renewal and non-renewable. Non-renewable energy sources are those that take millions of years to form and will run out some day. They are fossil fuels such as coal, crude oil and natural gas. However, renewable energy sources will never run out. Renewable sources include the sun, wind, heat from the earth and biomass (plants).~~

How can people and animals use plants energy ? By the							21
sources	4	sun	3	food chain	2	heat	1
People and animals get energy from food .							22
buying	4	heating	3	eating	2	collecting	1
Energy is the derived by using chemical or physical resources .							23
power	4	weakness	3	chain	2	activity	1
How many types of energy sources are there ?							24
four types	4	six types	3	three types	2	two types	1
What are the renewable sources of energy ?							25
natural gas	4	sun, wind and heat	3	fossil fuels	2	oil and coal	1
What are the non-renewable energy ? They are							26
food	4	fossil fuels	3	plants	2	power	1
Energy sources that take millions of years to form are the							27
non-renewable	4	renewable + non-renewable	3	biomass	2	renewable	1
The plants receive their energy from the							28
sky	4	star	3	sun	2	moon	1
Why energy is required ? It is required for.....							29
planting trees	4	using resources	3	metal or physical activity	2	eating food	1
The underlined word They refers back to							30
1	power	2	renewable energy	3	non-renewable energy	4	sources

Choose the best alternative : (2) points each .3

Read the following questions, and on the answer sheet, darken the number that matches the correct alternative.

Ask your neighbor our party.

join	4	joins	3	joined	2	to join	1	31
------	---	-------	---	--------	---	---------	---	----

Circle the compound word

farmland	4	disappear	3	faithful	2	peaceful	1	32

Read the following questions, and on the answer sheet, darken the number that matches the correct alternative.

Part One: Mark (T/True) for the true statements and (F/False) for the false ones. (1) point each.1

() There is sound in outer space .	1
() Synonyms are words with different meanings .	2
() Al-Khwarizmi was a great scientist .	3
() Lenses are pieces of glass that reflect light exactly .	4
() Liquid evaporates into vapors.	5
() Ingredients are things that you use in studying .	6
() " Flattened " means blown down to the ground .	7
() Litmus is a dead vegetable.	8
() Mules , camas and ligters are all crossbred animals.	9
() Books are made of paper.	10
() The mirrors reflect light	11
() Alkalis are bases that don't dissolve in water .	12
() A hill is higher than a mountain .	13
() Vaccination is giving disease to prevent disease.	14
() In a solid, particles have enough room to change place .	15
() A tractor is a machine used by a farmer.	16
() Environment is the world around us .	17
() The word " simmer " means grill gently.	18
() A coffee grower is somebody who grows cotton .	19
() Lemon and orange juice contain citric acid.	20

)Part two: A) Read the following passage then choose the best answer to the questions below: (2.2

~~Tennis is a sport played between two players (singles) or between two teams or two players (doubles). Each player uses a tennis racket to strike a hollow rubber ball covered with felt. To win, you must hit the ball into opponent's court without the opponent being able to hit the ball back. Tennis originated in the United Kingdom in the late 19th century. At first, people played tennis on courts made of grass! These were called "lawn courts". Now, tennis is played by millions of people all over the world. The rules of tennis have changed very little since it was created in the 1890s. Most tennis players play tennis because it is fun. It is also a good way to get exercise. While playing tennis, you do a lot of running, you move your arms and legs in many ways that they don't normally move.~~

The tennis ball is covered with							21
felt	4	fur	3	cotton	2	hair	1
What do you use to hit a tennis ball ?							22
racket	4	striker	3	fork	2	stone	1
Tennis is played by							23
two teams	4	one group	3	one team	2	one player	1
Tennis is a kind of							24
song	4	sport	3	art	2	food	1
Players hit the ball into opponents court to							25
lose	4	fail	3	challenge	2	win	1
Courts made of grass are called							26
football courts	4	low courts	3	lawn courts	2	stoned court	1
Why do most people play tennis ? To							27
win	4	waste time	3	study	2	have fun	1
Where did tennis originate ?							28
Asia	4	The united states	3	UK	2	Australia	1
When did people start playing tennis ?							29
1	late 19th century	2	late 18th century	3	early 19th century	4	early 18th century
The underlined word <u>it</u> refers back to							30
1	people	2	tennis	3	racket	4	ball

Choose the best alternative : (2) points each .3

Read the following questions, and on the answer sheet, darken the number that matches the correct alternative.

)Part two: A) Read the following passage then choose the best answer to the questions below: (2.2

~~Energy is the power derived by using chemical or physical resource and it is the strength and vitality required for sustained mental or physical activity. People and animals get energy from eating food, the plants receive their energy from the sun and in turn people eat the plants and animals that have also eaten plants- all made possible by the food chain. Sources of energy have been divided into two types, renewal and non-renewable. Non-renewable energy sources are those that take millions of years to form and will run out some day. They are fossil fuels such as coal, crude oil and natural gas. However, renewable energy sources will never run out. Renewable sources include the sun, wind, heat from the earth and biomass (plants).~~

How many kinds of malaria parasites that can infect human ?							21
three kinds	4	five kinds	3	four kinds	2	two kinds	1
Malaria infection can be " reduced". "Reduced " means							22
