

Model Answer for Geology experimental Exam, May 2021

no	Answer	no	Answer
16	decline and rising sea level during the Glacial period	1	Fossils
17	The mountains never disappear despite continuous erosion	2	2: 5 : 1
18	44	3	Revers fault
19	Convergence and results in basaltic rocks	4	Thrust and revers
20	A destructive movement accompanied by faults due to tectonic pressure	5	Less than 542 million year
21	(A)	6	Flint rock
22	constant value per an earthquake	7	Amethyst
23	Mineral's decomposition– expansion of rocks – erosion	8	(A)
24	Crescent dunes- Coastal Dunes	9	Galena
25	Rock resistance for degradation	10	sandstone and quartzite
26	degree of hardness of rock	11	Massive Metamorphic
27	more than 45 meter	12	Gabbro
28	The growth of rock mineral crystals	13	(A)
29	River falls	14	Energy inside the magma due to trapped gases
30	Presence of calcareous and siliceous organic micro-deposits	15	quartzite and gneiss
