The phrase a long journey at sea means: a) story b) mystery c) voyage

13- He saw a dream that made him feel his blood ran cold.

The idiom his blood ran cold means: a) very happy b) very sleepy c) very frightened

14- He stood there silently.

The word silently is: a) a verb b) a noun c) an adverb

15- we did the work _____.

a) myself b) ourselves c) itself

16- I want him _____ early.

a) comes b) to com c) came

17- the house I used to live _____ is very old

a) in b) on c) over

18- I have _____ English since 2010.

a) study b) studied c) studying

19- She hasn't seen her family _____ two months.

a) after b) since c) for

20- My best friend Anwar is as _____ as you.

a) smart b) smarter c) smartest

Crude oil is a very important natural resource. It is defined as being a fossil fuel. Thus, it is the product of decades old decay of sea plants and animals and is found in abundance in very old sea beds. Crude oil is a hydrocarbon, which means it contains hydrogen and carbon. These hydrogen-carbon bonds contain within them a lot of energy and so, through a refining process, crude oil can be used to produce many high-energy compounds such as fuels, namely gasoline. Crude oil is also a rich source of many other natural occurring elements besides hydrogen and carbon. Examples of these are Nitrogen, Oxygen and Sulfur. It is these qualities of crude oil that make it one of the most highly demanded resources in the world.

Write true or false

1- Crude oil isn't the product of old decay of sea plants and animals. ()

2- Crude oil contains hydrogen and carbon. ()

3- Gasoline is produced from Crude oil ()

4- Sulfur is not a produced from cruel oil ()

5- one of the most highly demanded resources in the world because ()

it is a rich source of many natural elements ()

Smoking is forbidden under the age of fifteen,
a) is it? b) isn't it ? c) didn't it?

10- The sentence 'Doctors have used Quinine to kill malarial parasite.' is an active sentence whose passive form is....

- a) Quinine has been used to kill malarial parasite by doctors.
- b) Quinine have been used to kill malarial parasite by doctors .
- c) Quinine is being used to kill malarial parasite by doctors.

11. The correct question for the underlined information in this sentence "On May 14th, 1796, Dr. Edward Jenner successfully used the first vaccine against smallpox." Is.....

- a) What did Dr. Edward successfully use the vaccine against smallpox ?
- b) Where did Dr. Edward successfully use the vaccine against smallpox?
- c) When did Dr. Edward successfully use the vaccine against smallpox?

12- If the cancer is caught in the early stage, an operation to remove the part of the lung affected.....save the smoker's life.

- a) might have b) might c) may

13- An epidemic is

- a) an illness that spreads quickly and effects only two persons.
- b) an illness that spreads and effects nobody .
- c) an illness that spreads quickly and effects many people.

14- You have a very bad You should stop smoking.

- a) fats b) wound c) cough

15- Lubna says "I have got a pain in my throat" is direct whose indirect form is..

- She said that
- a) she had got a pain in my throat .
 - b) she had got a pain in her throat.
 - c) she has got a pain in her throat.

16- The personI cure got a kidney failure.

- a) who b) whom c) whose

17- Handicapped means

- a) qualified people b) experienced people c) disabled people

18-is necessary for infants .

- a) Symptom b) High temperature c) Vaccination

1. Read the following extract. Then answer the question that follows:

Ocean and tidal waves offer a vast source of untapped energy that both government and industry need to exploit to benefit from its full potential. There are numerous advantages to this source of power, when compared to fossil fuel or nuclear generating plants. Once the power plant is built, the cost of continued operation and maintenance is negligible. This source of power is also renewable, unlike fossil fuels which generate much of the electrical power used today. In addition, there is no pollution created from the burning of fossil fuels, nor is there the danger associated with nuclear power plants. Tidal and wave devices appear to have only a minimal impact on the environment, and may even have a positive effect on coastal erosion. Finally, the energy produced is reliable and predictable, unlike the energy produced from wind power. Although research and development of this form of energy is still in the infancy stage, it offers future generations hope for a cheap, environmentally friendly source of electrical power.

- 1) The text above talks about:
 (a) fossil fuels. (b) waves energy. (c) oceans and coasts. (d) electricity.
- 2) The word vast in the first line of the text means:
 (a) very big. (b) cheap. (c) small (d) simple.
- 3) The word untapped in the first line of the text means:
 (a) dangerous. (b) plentiful. (c) unplanned. (d) untouched.
- 4) The word plants in the fourth line of the text means:
 (a) trees. (b) factories. (c) batteries. (d) fuels.
- 5) The phrase 'in the infancy stage' in the 12th line of the text means:
 (a) still a baby. (b) still a child. (c) at the beginning. (d) inexpensive.
- 6) Compared to fossil fuels, tidal energy is:
 (a) cleaner (b) more expensive (c) more beautiful (d) less noisy
- 7) Compared to nuclear power, tidal energy is:
 (a) more polluting (b) cheaper (c) cleaner (d) safer
- 8) Compared to wind power, tidal energy is:
 (a) dependable. (b) unexpected. (c) more expensive (d) less dangerous
- 9) Maintaining tidal energy plants is:
 (a) expensive. (b) difficult. (c) dangerous. (d) cheap.
- 10) Tidal and wave energy plants are for the environment:
 (a) bad (b) good (c) dangerous (d) polluting

Read the following passage carefully, and then answer the questions below it.

There are a number of smoking -related diseases. Together they cause 111,000 deaths a year in Britain. In other words, one person dies every five minutes. That is the length of time it takes to smoke one cigarette. When you takes into account the numbers of smokers worldwide, the number of deaths from smoking must run into millions every year. Smoking also increases the pulse rate and the blood pressure. This put an extra strain on the heart which can lead to a heart attack and possibly death.

Questions

Choose the correct answer.

1- The passage is about

- a) The total number of smokers.
- b) The production of cigarette in Britain .
- c) The effect of smoking.

2- After we read the passage we can conclude that

- a) smoking has no effect on the life of the people .
- b) smoking has serious effect on the life of the people.
- c) smoking has nothing to do with the life of the people.

3- Heart attack may happen

- a) due to heavy smoking.
- b) due to boiled water.
- c) due to eating fruits.

4- The sunus with light and heat.

- a) provides b) provided c) had provided

5- Ahmed met his doctor _____ Saturday last week .

- a) in b) at c) on

6- We canvitamins mostly in fresh fruit and vegetables.

- a) have found b) find c)found

7- Which punctuation mark should go at the end of this sentence?

Could you call a nurse

- a) . b) ? c) !

8- Fatima has a toothache, _____ she has to go to the dentist.

- a) so b) because c) when

Q1: Complete the sentences using the words in the box. Use each word once only: (2x5=10)

input space safe interference inferior

1. Some recent posterity of computers are too.....
2. Don't touch computer with wet hands! It isn't
3. All computers' work are based on data taking through..... units.
4. Computer cannot solve and treat data without.....of user.
5. is used to let gaps between letters and words.

Q2: Circle the best correct answer to complete the following sentences: (1x10=10)

1. The engineer has.....the computer.
a. mend b. mends c. mended d. mending
2. He doesn't speak English,?
a. does he b. do he c. did he d. don't he
3. Hasan has been an engineer1999.
a. ago b. since c. yet d. for
4. How oldyou?
a. be b. to be c. is d. are
5. While the phone was ringing, the bell door.....
a. ring b. rings c. rang d. ringing
6.internet is very important to keep in touch with others.
a. using b. uses c. use d. used
7. After hethe file, he shutdown the computer.
a. had saved b. has saved c. was saving d. will save
8. Most English teachersalready qualified.
a. are b. have c. has d. will
9. Fatima isfor Cairo next week.
a. leave b. leaves c. left d. leaving
10.you know his phone number?
a. does b. do c. did d. doing

8- Asphalt is one of the oil _____.

- a) producing b) produce c) products

9- if it _____ colder, you will need warmer clothes.

- a) got b) gets c) has got

10- I heard him _____ in his room.

- a) sing b) sings c) sang

11- Ahmad went to the doctor because he felt **sick**.

The opposite of **sick** is: a) bad b) well c) will

12- some of my friends had **a long journey at sea** yesterday.

Entrance Exam for Faculty of Dentistry 2018-2019

Answer the following questions – يمنع استخدام القواميس بأنواعها

Renal Calculi

A.A., a 48-year-old woman, was admitted to the in-patient unit from the ER with severe right flank pain unresponsive to analgesics. Her pain did not decrease with administration of 100 mg of IV meperidine. She had a 3-month history of chronic UTI. Six months ago she had been prescribed calcium supplements for low bone density. Her gynecologist warned her that calcium could be a problem for people who are "stone-formers." A.A. was unaware that she might be at risk. An IV urogram showed a right staghorn calculus. The diagnosis was further confirmed by a renal ultrasound. A renal flow scan showed normal perfusion and no obstruction. Kidney function was 37% on the right and 63% on the left. While the pain became intermittent, A.A. had no hematuria, dysuria, frequency, urgency, or nocturia. Urinalysis revealed no albumin, glucose, bacteria, or blood; there was evidence of cells, crystals, and casts. A.A. was transferred to surgery for a cystoscopic ureteral laser lithotripsy, insertion of a right retrograde ureteral catheter, and right percutaneous nephrolithotomy. A ureteral calculus was fragmented with the pulsed-dye laser. Most of the staghorn was removed from the renal pelvis with no remaining stone in the renal calices. She was discharged 2 days later and ordered to strain her urine for the next week for evidence of stones.

Case Study 13-2: End-Stage Renal Disease

M.C., a 20-year-old part-time college student, has had chronic glomerulonephritis since age 7. He has been managed at home with CAPD for the last 16 months as he awaits a kidney transplant. His doctor advised him to go immediately to the ER when he complained of chest pain, shortness of breath, and oliguria. On admission, M.C. was placed on oxygen and given a panel of blood tests and an ECG to rule out an acute cardiac episode. His hemoglobin was 8.2 and hematocrit was 26%. He had bilateral lung rales. ABGs were: pH, 7.0; P_{aCO_2} , 28; P_{aO_2} , 50; HCO_3^- , 21. His BUN, serum creatinine, and BUN/creatinine ratio were abnormally high. His ECG and liver enzyme studies were normal. His admission diagnosis was ESRD, fluid overload, and metabolic acidosis. He was typed and crossed for blood; tested for HIV, hepatitis B antigen, and sexually transmitted disease; and sent to hemodialysis. A bed was reserved for him on the transplant unit.

Case Study 13-3: Set-Up for Cystoscopy

Renovations had been completed recently in the new surgical suite, and J.O., a surgical technologist, set up the two new adjoining "cysto" rooms. Each room had a new cystoscopy bed with padded knee crutches for lithotomy position, a drainage drawer for irrigation solution collection, and radiology capability. The instrument storage carts were stocked with rigid and flexible cystoscopes, sheaths with obturators, and resectoscopes with assorted fulgurating loops, connectors, guide wires, laser fibers, and fiberoptic light cords. Sterile storage closets held assorted urethral and ureteral catheters, irrigation tubing and syringes, collection bags, biopsy needles and forceps, basic soft tissue instruments, and dressing supplies. An electrosurgery machine was placed in each room. Cysto no. 1 had the CMG machine and urinometer. Cysto no. 2 had a Nd:YAG (neodymium:yttrium-aluminum-garnet) and a liquid tunable pulsed-dye laser machine. Each room had a machine to collect and decontaminate the liquid waste, instead of the former floor drains. The substerile room between Cysto no. 1 and no. 2 had a steam sterilizer, a peracetic acid processor/sterilizer, and glutaraldehyde soaking pans under a ventilation hood to high level-disinfect the instruments between cases. A warming closet contained blankets and sterile PSS, H₂O, and glycine for bladder irrigation during the procedures. J.O. wished there was room left for an ESWL system.

Multiple choice: Select the best answer and write the letter of your choice to the left of each number.

_____ 1. The term perfusion means:

- a. size
- b. shape
- c. passage of fluid
- d. surrounding tissue

_____ 2. M.C.'s chronic glomerulonephritis means that he has had:

- a. long-term kidney stones
- b. an acute bout of kidney infection
- c. short-term bladder inflammation
- d. a long-term kidney infection

...renal dialysis can be performed by shunting venous blood through a dialysis machine and returning the blood to the patient's arterial system. This procedure is called:

- a. hemodialysis
- b. arterio/venous transplant
- c. CAPD
- d. phlebotomy

4. A surgical endoscope that can enter and visualize the bladder is a(n) _____, whereas a scope that cuts tissue is called a(n) _____.

- a. cystoscope, resectoscope
- b. resectoscope, fulgurating loop
- c. urinometer, obturator with sheath
- d. cystoscope, scissorscope

5. A transurethral approach for examination or surgery always begins with inserting a catheter or scope:

- a. through the ureter
- b. alongside of the urethra
- c. between the ureters
- d. through the urethra

* Choose the correct answer.

6. _____ a fluent speaker of English?

- A) Is her
- B) He
- C) Does she
- D) Is she

7. This is a desk, and _____ tables?

- A) those are
- B) these
- C) that are
- D) that is

8. This is _____ boyfriend?

- A) hers
- B) of her
- C) to him
- D) her

9. There are _____ people in the office.

- A) the
- B) little
- C) some
- D) any

10. _____ money on Helens table?

- A) There is some
- B) There is any
- C) Is it some
- D) Is there any

11. A: Where's Helen?

B: She _____ in the office

- A) is sitting
- B) sit
- C) sitting
- D) sits

12. She _____ French and English, so she has got a good job.

- A) speak
- B) speaks
- C) speaking
- D) is speaking

13. A: What _____?

B: She is writing a letter.

- A) does she do
- B) does she
- C) is she doing
- D) she is doing

14. She _____ speaks no foreign languages.

- A) is not
- B) ___
- C) doesn't
- D) don't

15. A: Are Peter and Mary still sitting in the office?

B: No, _____

- A) they don't sit
- B) they standing
- C) there aren't
- D) they aren't

16. What language _____?

- A) do you speak
- B) you speak
- C) you are speaking
- D) speak you

17. A: Are there any people in the bar?

B: No, _____

- A) any
- B) there aren't
- C) there isn't
- D) are there

18. Helen has got only _____ money.

- A) any
- B) a little
- C) no
- D) few

Read the following passage carefully, and then answer the questions below it.

Sound travels as waves. Unlike light waves, sound waves need a substance, such as air to travel through. Because sound waves cannot travel through a vacuum, there is no sound in outer space. Sound rang from very low to very high. What makes the pitch different is the frequency of the sound waves

Choose the correct answer.

1. The above passage mainly explains :
 - A. Sound and its types
 - B. The necessity of the sound
 - C. The nature of the sound and its movement.
 - D. Sound and its effect
2. After we read the passage we can conclude that
 - A. sound waves are the same as light waves.
 - B. No differences between sound waves and light waves.
 - C. Sound waves have the same features as the light waves.
 - D. Sound is not as light.
3. Sawsan studied hard — she got the highest mark in her exam
 - A. because
 - B. so
 - C. but
 - D. whereas.
4. When I got to the airport, the plane.....
 - A. went
 - B. goes
