

# GRADE 10 - EXAM 2 ( UNIT 7+8+9+10+11+12)

## A. Read the text then do the tasks below :

Pollution is the introduction of harmful materials into the environment. These polluting materials can be natural, such as volcanic ash. They can also be created by human activity, such as trash or waste produced by factories. Pollutants damage the quality of air, water, and land. Sometimes, air pollution is visible. A person can see dark smoke pour from the exhaust pipes of large trucks or factories, for example. However, air pollution is invisible. Polluted air can be dangerous, even if the pollutants are invisible. It can make people's eyes burn and make them have difficulty breathing. It can also increase the risk of lung cancer. Some polluted water looks muddy, smells bad, and has garbage floating in it. Some polluted water looks clean, but is filled with harmful chemicals you can't see or smell. Polluted water is unsafe for drinking and swimming. Some people who drink polluted water are exposed to hazardous chemicals that may make them sick years later.
