One day, an unemployed man called Daniel went to apply for a job with Microsoft as a cleaner. The manager said: "Let me have your e-mail address, so that I can send you a form to complete." The man said he had no computer or email address. The manager said: "Well, then, that means that you can't be employed." The man looked at the last £10 in his wallet and thought of buying tomatoes in bulk. Within less than 2 hours, he sold all the tomatoes. Repeating the process several times that day, he ended up with almost £100. Getting up early every day and going to bed late, he multiplied his **profits** quickly. After a short time he bought a cart to transport boxes of tomatoes. By the end of the second year, he became the owner of a fleet of trucks.

Maria Smith is a successful teacher. Her students like and respect her. She helps her students enjoy and learn their lessons by following a method called "Learn and play." This technique encourages children to work together. She has two goals. The first goal is to change their behaviour and the second goal is to improve their academic achievement. She thinks there should be no violence in schools. She wants children to live in peace with their families and be friendly with their classmates. In her lessons, she uses balloons and toys to make it interesting to learn and she pays with her own money. Last week she won a global prize of five hundred thousand dollars. She wants to use the money to help poor families and build a new and developed school.

Light Initiative started with two people and now it includes more than 350 volunteers. They voluntarily record school and college books for the benefit of the visually impaired people. They started recording the books of the 9<sup>th</sup> and the 12<sup>th</sup> grades; they also record university books and **references**. Their aim is to meet the visually impaired people's needs. Usually, the visually impaired person contacts the initiative administration and provides them with the books needed. Then, the book is divided into tasks for a number of volunteers to record them. On their Facebook page they announce that they finished this book or curriculum, and they use the YouTube channel to publish the recordings. Their services are absolutely free. Volunteers use mobiles for recording and laptops to do the montage.

The tradition of suspended coffee started in Naples, Italy during the 20<sup>th</sup> century. In cafés people used to pay for two cups of coffee; one for themselves and the other for someone who couldn't afford it. This tradition has spread all over the world and in some countries, you can order not only suspended coffee, but also a sandwich or a meal. In 2011, the officials in Naples introduced a "Suspended coffee day" to be celebrated each December. After ten years, John Sweeny heard about this and it motivated him to create a Facebook page and this page has inspired people to buy millions of cups of coffee for others. The message of Sweeny is that an act of kindness can change a life.

Life in the future will be very different. Futurologists **predict** that life will probably be very different in all the (fields of activity), from entertainment to technology. Some people have imagined that life in the future would be so easy and relaxing, while others have seen that it would be worse and more difficult. I think that in the future we will have a more comfortable life. This will be obvious in all aspects of life. First, as for education, people will have better education because of technology. E-books will replace traditional books, robots will replace teachers, and students will not have to go to schools every day as **they** will study at home through on-line teaching. So even absent students will learn.

1. Life in the future will -----

One day people will live on the moon. When that day comes, they will need to build cities. They need to plan well for these cities because they are not easy to build. The city will get its energy directly from the sun and will obtain water from ice. Life on the moon will not be different from life in towns and cities. There will be houses, schools and factories. People will be able to breathe normally and wear normal clothes. People will live a comfortable life because robots will do the housework for them. People will not stop on the moon but they will make it a place to go to other parts of our universe.

We are experiencing a technological progress every month now. The world is changing and the changes are very dramatic. We should focus on some forms of alternative energy such as solar power, wind power, and water power which lead to environmental sustainability. We need to answer questions about what can be sustained and what cannot, where cities can be located and where they cannot, and how we might travel in and between them and how we can physically live and work together. We need to prevent environmental degradation and stop the expansion of deserts. Future cities can collect water and use solar power to irrigate the dry land. Future cities should be surrounded by rivers and provided with renewable energy resources and green vehicles heading towards more **ecological** forms of public transport.

Autonomous vehicles are self-driving cars. They can do all driving tasks that a human driver is able to do. These vehicles have many advantages. They are efficient and can work all the time without getting tired. They are safer and the number of accidents will fall. Thousands of accidents happen every year because drivers fall asleep while they are driving. People who can not drive can depend on these vehicles. For example, visually impaired people will benefit from them because they will take them everywhere they want at any time. However, autonomous vehicles will cause financial problems because many drivers will lose their jobs. As a result unemployment will increase. Governments will also lose the money they get from car insurance and fines.

Sam walked into a cake shop, after he'd finished his work, to buy his daughter a birthday cake. It was about four o'clock and the store usually closes at five. So he should make up his mind quickly and decide what he should buy. Sam asked himself "Which one should I choose?" He began wandering in the shop **watching** the various kinds of cakes which were kept in the refrigerators around. The cakes looked very delicious and tasty so that it was difficult for Sam to choose. Time was passing but in vain. Sam couldn't decide yet, when he heard the chef saying "Come on. Decision making is the process of making options and choosing the best one. It is a step - by- step process. First, you should realise that you need to make a decision and identify the problem you need to solve or the question you need to answer. Then you need to collect enough information and make many alternatives. You need to choose one of the alternatives after studying all of them carefully. You can get help from your family and friends. When you choose the most suitable alternative, you should start action. If you find out that the alternative you have chosen doesn't work, you need to stop and think of another one. It is necessary to make decisions in our lives because if we don't do that we will end in nothing.

Thomas Edison is one of the most famous inventors in history. He invented so many things that helped people live a more comfortable life. He stayed in school for only three months because he was so different from other students. He wanted to understand everything, so he could not memorise his lessons. His teachers thought that he was mentally ill and asked him to leave school and study at home. His mother taught him at home because she believed that her son would be a great scientist. During his life, he failed many times but this never made him frustrated. Every time he failed, he learnt something new and he made this failure a step towards success. He never gave up and tried many times until he succeeded. His story teaches us that we can achieve our goals when we work hard.

My name is Tom. Today is the second day of my **trek** around Mount Annapurna. I am exhausted and my legs are shaking; I just hope I am able to complete the trek. My feet are really killing me and my toes are bleeding, but I still want to continue. Nepal is a fascinating country, but I have a great deal to learn. Everything is so different, and I am trying to adapt to the new way of life here. I am travelling with Liam, a student from Leeds University in England. He is a nice guy, but impatient. He always walks ahead of me and says that I am too slow. I am doing my best to keep up with him, but he is younger and stronger than I am.

There are several factors that determine our level of happiness. One of the factors is good relationships. People who have close relationships with their friends and families usually live happier lives. Friends and family give you emotional support and help you make good decisions and face problems. Money helps us buy things and live a more comfortable life, but we don't have to have much money to be happy. When you do your favourite activity, you feel so happy that time passes so quickly without you noticing it. This experience is known as 'flow'. When we look at things positively and with optimism, we become happier. Being happy is good for you and society. It makes you healthier and stronger and you can contribute more to the community.

Frane Selak was born in Croatia in 1929. He led a relatively unremarkable life as a music teacher. Selak's near-death experiences began in January 1962 when he was travelling by a train from Sarajevo to Dubrovnik. The train left its railway tracks and ended up in a river. Fortunately, an unknown person pulled him to be safe, while 17 other passengers drowned. The next year, Selak boarded a plane from Zagreb to Rijeka. Unfortunately, he was blown out of its door and luckily landed in a haystack; The plane crashed, killing 19 people but Selak survived. The final famous disaster was in 1996 when a truck came barreling towards his car as he was driving around a mountain road. Selak was ejected from the car but he managed to hold onto a tree, and watched his car in horror **plummet** down.

The Titanic was a British ship which sank in April, 1912 during its first journey across the Atlantic Ocean, killing about 1500 passengers out of 2200. It was one of the largest ships in the world. The builders of the ship said that this ship would never sink. The ship hit a large iceberg and the water started to flow into the ship. It began to send help signals but the nearest ship that received the signals needed about three hours to reach the Titanic. There were 20 boats which could carry 1178 people and in the end only 705 people were rescued in lifeboats. Hundreds of passengers went into the icy water and by the time people in the lifeboats came back to help them, all of them had died.

A poor family was living happily until the son felt severely ill. The doctor said that his condition was critical and he needed a miracle to survive. After she had heard the doctor's words, the little daughter rushed to the nearest pharmacy with the only pound she had in her money box and asked him to give her a miracle. The pharmacist was busy talking to his brother. After a while he replied, "who told you I sell miracles?" She looked helplessly watching in despair. Suddenly the pharmacist's brother kneeled asking her, "tell me, sweetie, why do you need a miracle?" Without thinking, "I don't know, the doctor said that my brother needed a miracle for an operation not to die." "Is this pound enough?" "One pound is exactly enough", **he** answered with a big smile and a **tender** voice.

A selfie is a photograph that you take for yourself using a digital camera or a smart phone. Selfies are often published using social media. It is common that people take out their smart phones and take selfies of themselves. But when selfies are taken in dangerous situations, they can cause death. These dangerous selfies are taken while travelling, when people scale very tall buildings and other places to capture a photo to remember. Some selfie takers shoot dangerous selfies to spread around the world and be famous. Many people lost their lives while trying to take selfies. For example, a pilot died when he lost control of his plane while he was trying to take a shot. Our lives are valuable and we shouldn't lose them by such irresponsible behaviours.

Mary was a teacher who wanted to motivate her students and make them do their best in the exam. So, she told them that she would give a simple and symbolic gift, which is a new pair of shoes, to the one whose marks were excellent. Children rejoiced over this **challenge** and they all started writing diligently. After collecting the papers, the teacher was surprised to find that everyone had a full mark. The teacher thought of a suitable solution with her students. Each student wrote his/her name on a folded paper and put it in a box from which the teacher picked one. So, the paper would reveal the name of the award's winner. Indeed, the teacher pulled a paper in front of all students and read the child's name [Nada].

**A- Read the following text then choose the correct answer a, b, c , or d: ( 50 m )**

Once, a king and a lazy man named Hani were good friends. One morning, the king said, "You can go into my treasury and collect as much wealth as you can, but you have to finish before sunset." Hani rushed home to tell his wife. She said, "Go and get the gold coins and **gems** now." He said: "I am so hungry. I'd like to eat first." After lunch, he took a nap for an hour. Then in the late afternoon, he went to the palace. On the way, he felt hot so he sat under a tree. Two hours later, when he wanted to move on, he saw a man showing some magic tricks. He stopped to watch for an hour. When he reached the palace, it was already sunset time. Hani lost a golden chance because he had not learnt the value of time.

1. The lesson that the story teaches us is -----

- a. You should collect as much wealth as you can  
b. Once time is spent, it will come back again  
c. You should look for gold coins and gems  
d. You should know how to manage time

2. Hani didn't get the treasure because -----

Life is too short and our time is too precious to waste. People usually need to sleep eight hours at night and there are still sixteen hours left in a day. It is important to manage your time. You can make a list of the important things you have to achieve and start with the most important or the most difficult. Time management helps you to achieve your goals faster and easier. It helps you to prioritize better and makes you more productive. It also reduces stress and increases your happiness. People who say that they don't have time to complete their work don't really know how to manage time. Time is very valuable and when you spend it you can't get it back. Therefore, we should know how to manage time in order to make the best of it.

6. People should sleep for sixteen hours a day. **T F**7. If you manage your time well, you do things more quickly. **T F**8. We should waste time. **T F**9. Time management makes you happier and less stressed. **T F**10. We should be aware of the value of time. **T F**

**A- Read the following text then choose the correct answer a, b, c , or d: ( 50 m )**

The wish to communicate with the outer space has always been there in our minds. As the 20th century began, interest in the possible life on Mars and the possible civilizations there led to a search for signals. In the late 19<sup>th</sup> and early 20<sup>th</sup> centuries the idea of wirelessly sending and receiving waves through the air was developed. In 1901, engineer Nicola Tesla made the **astounding** claim that he was receiving radio communications from Mars. His story was picked up and reported in the press. The Media was captured by the idea of communicating with Mars but it did not find much serious interest from scientists. It became increasingly clear that there was no intelligent life on other planets in the solar system.

1. The main idea of the text is -----

Inspiration plays a very important part in our lives. Through inspiration, you can make a positive difference in the lives of others. First, you need to show a person that you care about them. This can be done through words and through acts of kindness. To inspire people around you, you need to forget about your stress and problems and show them that you are strong. You can give people advice but you need to give them freedom to try things themselves. You should be a good example for others to follow because people watch what you do more than they listen to what you say. In this way you can get the trust of others. When you inspire others, you motivate them to do their best and achieve more.

Language is considered a very complex form of communication that occurs among humans who use words while talking to express their needs. Animals also show signs of communication such as a bird singing a song or a dog wagging its tail when excited. Researchers say that animals do not have a true language like **humans**. However, they do communicate with each other with sounds and gestures. Children show these same forms of communication as babies when crying and gesturing, but they slowly learn the words of language and use them as a form of communication. Dogs can be trained to follow certain commands such as 'sit' and 'come'. Dogs are experts at reading their owners' intentions and they do not respond to actual words but the tone in which it is said.

1. The main question that the text discusses is -----

- a. Do people have a language?  
 b. Do animals have a language?  
 c. How do people communicate with each other?  
 d. Is human language creative?

Communication between people can be verbal by using a language to speak to others, or non - verbal by using body language like gestures or facial expressions. Through body language people can express different feelings and attitudes. The way you sit, stand and walk; for example, communicate a lot of information to the people around you. There are different meanings expressed by body language and these meanings can even differ from one place to another. Facial expressions are mostly universal. Expressing feelings like happiness, sadness and anger are almost the same all over the world. Eye contact is another non-verbal language. Looking away while a person is talking is a sign that you are not interested. You have to pay attention to body language because it can tell many unspoken words.

6. Facial expressions are a verbal form of communication.      **T**      **F**

Making friends from all over the world is easy nowadays. We only have to sign up to a pen pal website. When we create a profile, we will be asked to fill out basic details about ourselves; like our interests, the country we are from, and our birth date. We will be able to have conversations with new friends in different countries, so learning another language can help us build bonds with people that speak foreign languages. We must be polite when asking them about their lives and things that they are interested in. Being a nice person and willing to learn about new experiences will help you make friends wherever you go. People in different countries have different cultures and different life styles, which enriches our knowledge. We have to **respect** other people's privacy and try to learn the best from **them**.

Last summer I was sleeping in my bedroom when I heard a lot of noise. I quickly got up and found that the house was on fire. Smoke and flames were everywhere and I could not breathe easily. I felt nervous and didn't know what to do. Luckily the firemen came in time and got me out of my room through the window. It was a terrible day.

I am active at the weekend. I get up at six o'clock and go running. Then I have a healthy breakfast and help my father in the shop. In the afternoon I go swimming and fishing in the river with my brothers. In the evening, I play music with my friends. Before I go to bed at eleven o'clock, I read a story. I enjoy the weekend very much.

Ahmed came forward with joy and tears in his eyes. He thanked everyone for this wonderful gift, which is a shirt. His parents couldn't buy him a new shirt because of their poverty.

I have a great family. I have two brothers and one sister. All the members of my family are kind and friendly. They always motivate me to work hard and be successful. They understand how I feel and help me when I have a problem. I'm really lucky to be a member of this family.

My school is very good. It is in the city centre. It is beautiful, big and clean. There are thirty modern classrooms, a library and a lab. We study different subjects like English, maths, science and art. I like my school because it is interesting and the teachers are very good and friendly.

I prefer shopping in street markets. I go shopping there every day and I buy everything I need from there. I usually buy fruit, vegetables, sugar, oil and many things. I spend about ten thousand pounds a day. I like shopping there because it is interesting and the prices are not expensive.

It is necessary to be fit and healthy. You should do sport. It's a good idea to get up early every morning and go running. If I were you, I would walk or ride a bike instead of taking the bus. You should eat healthy food like fruit and vegetables. You should sleep for about eight hours a night. If you do this, you'll be happy in your life.

Last night I heard a lot of noise outside and I ran out quickly. The house next door was on fire. Smoke and flames were coming out of the windows.

My favourite hobby is reading. I like reading because it is interesting and relaxing. I read at home every day before I go to bed and I go to the library at the weekend. I prefer reading adventure stories and history books. Reading is useful because it gives you a lot of information and you can understand the world better. I advise all people to read.
