experience unique. Next month, we will make a change so that we can really stand out and introduce touch-screen ordering which is also known as "digital dining." As an employee, you need to know about this new technology.

This is how touch-screen ordering works. Each table will have its own touch-screen computer. Customers can view the menu on the screen, including descriptions and photos. To start, the customer inserts his credit card and puts in his order by touching the screen. Then the program automatically makes suggestions for additional items to order, such as appetizers and drinks. When the customer is ready, he pushes a button to send the order directly to the computer in the kitchen. Won't that make your job as a server easier? All you have to do is bring the food to the table when it's ready! Finally, paying the bill is quick and easy because the customer can do it himself. This exciting new technology will improve our customers' dining experience and increase your tips!

Now you may want to know how this change will affect you. Maybe you are afraid of losing your job. Let me assure you, you won't. In fact, you will be able to serve more customers every night! These high-tech computers not only look cool, they decrease the number of tasks you have to do. Hopefully, this means that you can serve more tables without feeling stressed!

Here are some questions and answers.
Q: What are the benefits for me as a server?

will automatically suggest additional items to order. Research shows that when this happens, customers order more. We estimate that customer bills will be 15 to 20 percent higher. With more customers ordering more items, you will earn more money in tips. In addition, you won't have to repeat the same information over and over like a robot. Finally, customers can't blame you for errors in their order—they place their orders themselves! Won't that be nice?

Q: Will customers really want to do their own ordering?
A: Yes, I think that most of our customers will love it! If a diner prefers the traditional service, we will provide it. But these monitors will be so much fun that everyone will want to use them! The photographs will be fantastic and the descriptions will be mouth-watering. As you know, most of our customers are tech-savvy, and they enjoy interacting with the latest gadgets!

Q: What other features will these touch-screens have?
A: They'll have entertaining games and high-speed Internet access. Customers can send messages to friends and post photos of themselves at the table.

We will be having an employee training session next Tuesday from 9:30-11:00 a.m. to show you how digital dining works. I look forward to presenting this fabulous new system to you!

At the customer has to do is collect the food when it is ready.

Question 3 :
Which of the following statements from the memo is an OPINION?

- But these monitors will be so much fun that everyone will want to use them! (Paragraph 5)
- Each table will have its own touch-screen computer. (Paragraph 2)
- Customers can send messages to friends and post photos of themselves at the table. (Paragraph 6)
- Also, the computer program will automatically suggest additional items to order. (Paragraph 4)

Question 4 :
According to the article, which of the following sentences is FALSE?

- The training session will be next Tuesday from 9:30-11:00 am.
- The company is always looking for better ways to serve their customers.
- They estimate that customers' bills will be 15 - 20 % lower.
- Most of their customers will enjoy interacting with the latest gadgets.

Reading 1.2: Read the memo and choose the best answer for each item: a, b, c, or d.

MFC MADRASIAN FRIED CHICKEN

MEMO

DATE: November 7
TO: Servers
FROM: Rayan Al Arabi, Dining Room Manager
RE: New touch-screen ordering

At Madrasian Fried Chicken, we are known as a cool, trendy place for people who want some great fried chicken. We are always looking for better ways to serve our customers and make their experience unique. Next month, we will make a change so that we can really stand out and introduce touch-screen ordering which is also known as "digital dining." As an employee, you need to know about this new technology.

This is how touch-screen ordering works. Each table will have its own touch-screen computer. Customers can view the menu on the screen, including descriptions and photos. To start, the customer inserts his credit card and puts in his order by touching the screen. Then the program automatically makes suggestions for additional items to order, such as appetizers and drinks. When the customer is ready, he pushes a button to send the order directly to the computer in the kitchen. Won't that make your job as a server easier? All you have to do is bring the food to the table when it's ready! Finally, paying the bill is quick and easy because the customer can do it himself. This exciting new technology will improve our customers' dining experience and increase your tips!

Now you may want to know how this change will affect you. Maybe you are afraid of losing your job. Let me assure you, you won't. In fact, you will be able to serve more customers every night! These high-tech computers not only look cool, they decrease the number of tasks you have to do. Hopefully, this means that you can serve more tables without feeling stressed!

Q1: what is a person's job ?

A1: he is student at university

The screenshot shows a digital interface for a language test. At the top, there are four tabs: 'Speaking-Audio', 'Speaking-Text', 'Writing', and 'LanguageUse'. Below the tabs, there are four red boxes numbered 1, 2, 3, and 4. The main content area is divided into two columns. The left column contains a reading passage with several paragraphs. The right column contains three multiple-choice questions. The first question is 'What is the main idea of the blog?' with four options: 'Speaking to a machine is very frustrating. (Paragraph 5)', 'I think I would have been happier living a hundred years ago. (Paragraph 5)', 'Technology is great. (Paragraph 1)', and 'Question 3 :'. The second question is 'Question 3 : What is the main idea of the blog?' with four options: 'Online registrations do not work well.', 'Self-service checkout systems are difficult to use.', 'New technology can be frustrating.', and 'Speaking to machines is frustrating.'. The third question is 'Question 4 : When did David try to register online for university?' with four options: 'Last year', 'Yesterday', 'Last week', and 'In his second year'. The interface has a light blue background with a grid pattern.
