III. Read the following passage and then answer the questions below. (15 Marks)

According to Greek mythology, Atlas was a Titan of enormous strength. After being defeated by the god Zeus, Atlas was forced to carry the earth and the sky for an eternity. In depictions of Atlas, he is shown as a stooped figure carrying the globe on his shoulders. Because of his association with the globe, maps began to be decorated with this image of Atlas. Accordingly, the word "atlas" became a nickname for a collection of maps. Today, an atlas refers to any book that consists of a bound collection of maps. For example, an atlas can be made up of maps of the countries of the world or of the states of the United States. Sometimes an atlas will also contain graphs and charts with other statistical information about the culture, religion, climate, or government of the population of a given area.

The White Nile, which begins at Lake Victoria in Uganda, supplies about 28% of the Nile's Egyptian waters. In its course from Lake Victoria to Juba in southern Sudan, the White Nile's channel drops more than 600 m. In its 1,600-km course from Juba to Khartoum, Sudan's capital, the river descends just 75 m. In southern and central Sudan, the White Nile passes through a wide, flat plain covered with swamp vegetation and slows almost to the point of stagnation.
