

1 of 2 First Homework for 101 Stat

(4 marks)

1) Give an example for each of the following:

- i) Discrete variable.
- ii) Continuous variable.
- iii) Qualitative variable.
- iv) Quantitative variable.

(6 marks)

2) Classify each variable as qualitative or quantitative.

- i) The variable that recording the weights of people.
- ii) The variable that recording the type of cars.
- iii) The variable that recording color of flowers.
- iv) The variable that recording the ID of students in CFY.
- v) The variable that recording the temperature in cities.
- vi) The variable that recording nationalities of the workers in SA.

(5 marks)

3) Classify each variable as discrete or continuous:

- i) The variable that recording the lifetime of devices.
- ii) The variable that recording the number of buses in Riyadh.
- iii) The variable that recording numbers of people in shops.
- iv) The variable that recording the heights of people.
- v) The variable that recording the deep of wells.

(8 marks)

4) The following data give the results of a sample survey. The letters O, A, B and AB represent the Blood groups of people:

AB	A	B	B	O	B	O	O	A	B
AB	B	O	B	A	O	B	A	AB	AB
B	A	O	O	B	AB	B	A	AB	O

- i) Prepare a frequency table of this data. **(2 marks)**
- ii) Calculate the relative frequencies and percentages for all symbols. **(2 marks)**
- iii) What percentage of the elements belongs to category B? **(2 marks)**
- iv) Draw a bar chart and pie chart for the frequency table. **(2 marks)**

(7 marks)

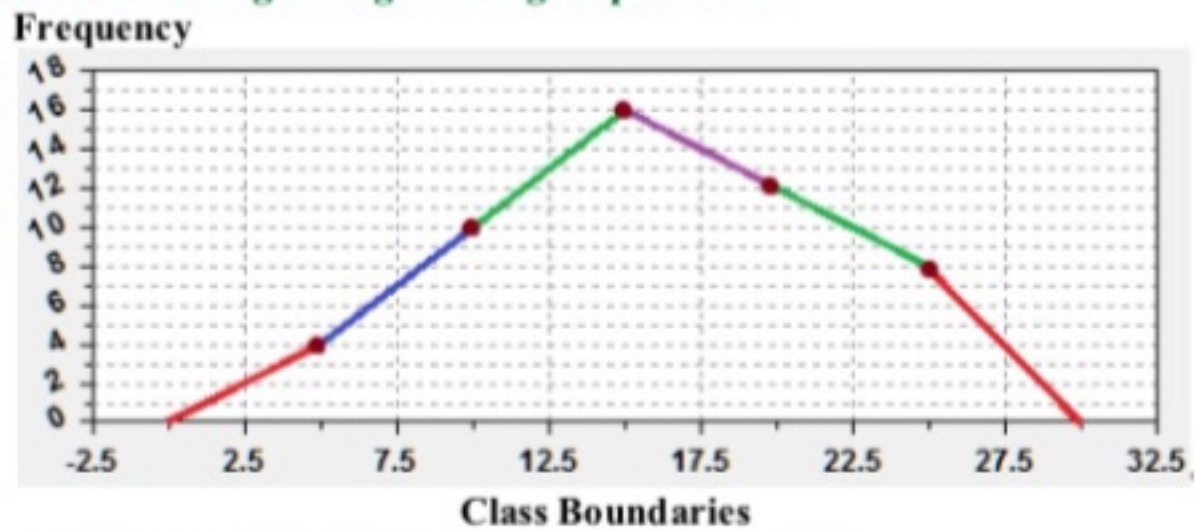

5) Forty children were asked about the number of hours they watched TV programs in the previous week. The results were found as follows:

8	10	12	14	12	10	8	6	4	2
10	3	4	12	2	8	15	1	17	6
1	6	2	3	5	12	5	8	4	8
3	2	8	5	9	6	8	7	14	12

Construct a frequency distribution table for this data.

(4 marks)

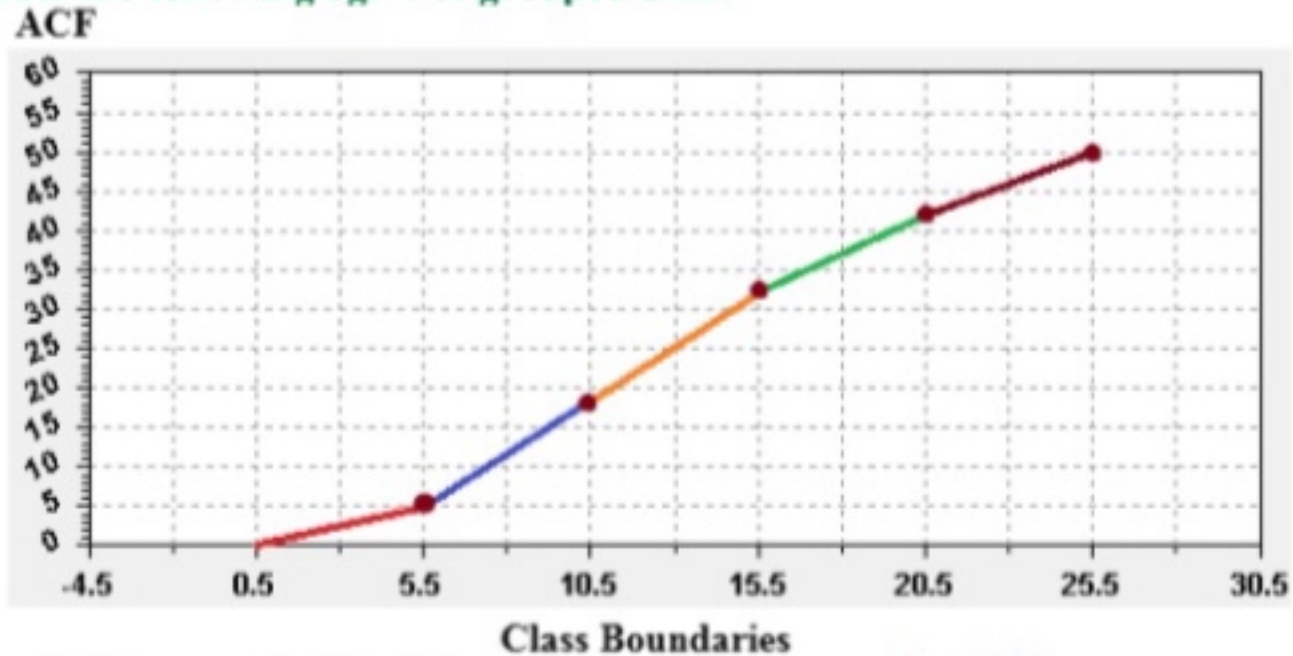

6) Consider the following histogram of grouped data:

Then draw ascending cumulative frequency polygon for this table.

(4 marks)

7) Consider the following ogive of grouped data:

Then draw the histogram for this table.

(2 marks)

(12 marks)

6) Consider the following frequency distribution table of a sample data:

Class Limit	Class Boundaries	Midpoint	Frequency	A.C.F.
3 - 7	2.5 - 7.5	5	5	5
8 - 12	7.5 - 12.5	10	8	13
13 - 17	12.5 - 17.5	15	12	25
18 - 22	17.5 - 22.5	20	10	35
23 - 27	22.5 - 27.5	25	5	40
Sum	المجموع		40	

Draw the histogram, polygon and ascending cumulative frequency polygon for this table.

Q1
 1- Number of cars 2- Height of building 3- eyes color
 4- Age-Height-Weight.

Q2
 1- Quantitative 2- qualitative 3- qualitative 4- qualitative 5- quantitative
 6- qualitative

Q3
 1- continuous 2- discrete 3- discrete 4- continuous 5- continuous

Q4

Blood group	Frequency	relative frequency	Percentage
A	6	$6 \div 30 = 0.2$	20%
B	10	$10 \div 30 = 0.33$	33%
O	8	$8 \div 30 = 0.267$	26.7%
AB	6	$6 \div 30 = 0.2$	20%
total	30	1	100%

③ = 33%

- 1- $0.2 \times 360 = 72^\circ$
- 2- $0.33 \times 360 = 118.8 \approx 119$
- 3- $0.267 \times 360 = 96.12 \approx 96$
- 4- $0.2 \times 360 = 72^\circ$

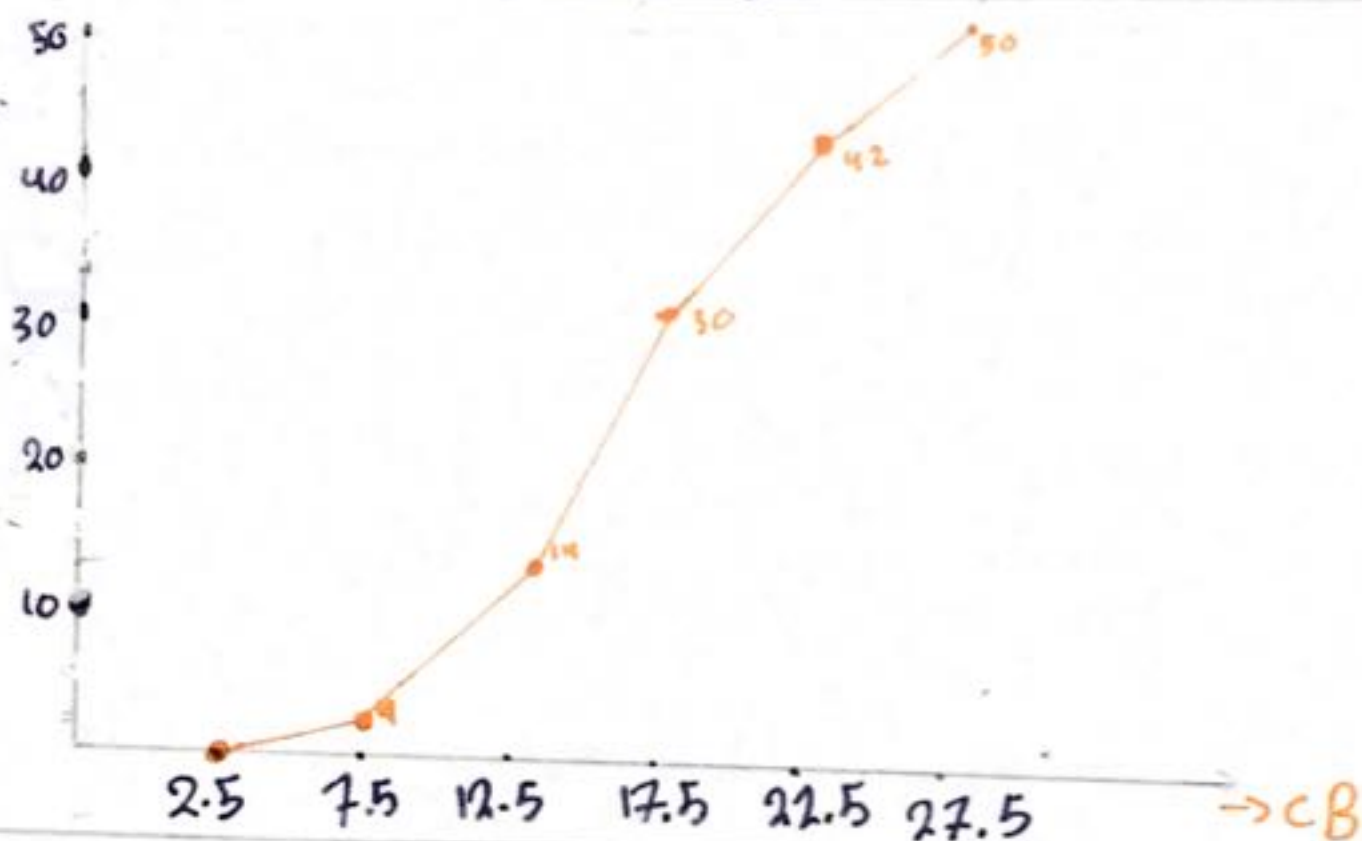

Q5
 $k = \lceil 3.322 \times \log(40) \rceil = \lceil 5.32 \rceil = 5$ $c = \frac{R}{k} = \frac{17-1}{5} = 3.2 = 4$

Class limit	Class Boundre	class mid Point	Frequency	Relativ Frequency	Percent Frequency	ACF
1-4	0.5 - 4.5	2.5	12	0.3	30%	12
5-8	4.5 - 8.5	6.5	15	0.375	37.5%	12+15=27
9-12	8.5 - 12.5	10.5	9	0.225	22.5%	27+9=36
13-16	12.5 - 16.5	14.5	3	0.075	7.5%	36+3=39
17-20	16.5 - 20.5	18.5	1	0.025	2.5%	39+1=40
total	-	-	40	1	100%	-

Q6

class Boundre	Frequence	mid Point	A.C.f
2.5 - 7.5	4	5	4
7.5 - 12.5	10	10	14
12.5 - 17.5	16	15	30
17.5 - 22.5	12	20	42
22.5 - 27.5	8	25	50
	total 50		

Acf

Q7

class Boundre	A.C.f	Frequence
0.5 - 5.5	5	5
5.5 - 10.5	18	13
10.5 - 15.5	32	14
15.5 - 20.5	42	10
20.5 - 25.5	50	8
		total = 50

→ class Boundre

Q8

Polygon

Histogram
