Writing: ordering parts of a paragraph about volunteering

Reading

Read the following text then do the tasks below.

A Different Class

Hanan Al-Hroub was a poorly paid teacher in the West Bank. Then she won the \$1 million Global Teacher Prize. The **committee praised** Mrs. Al-Hroub's "play and learn" method, which she still **employs**.

Besides her clown **outfit**, Mrs. Al-Hroub uses balloons, hula-hoops, toy cars and puppets to explain her lessons. Her aim is to make the classroom a calm and fun place where children can forget about the **struggle** of daily life, and open their minds.

"We play first, and when we play we learn," she said. "The kids don't even realise they are learning."

In addition to the toys and balloons, which she pays for with her own money, she uses videos and even PowerPoint in the classroom. For the first month of a new school year, her eight-year-old pupils may not even see an exercise book.

Parents often refuse the focus on play. That soon changes, Mrs. Al-Hroub says, when they realise that her methods improve behaviour – especially in troubled kids – and academic results. She also sees it as her duty to build their characters. "No to **violence**" is a motto in her classes.

Mrs. Al-Hroub plans to establish her own foundation and use some of her winnings to train other teachers to follow her approach.

It is worth mentioning that Mrs. Al-Hroub's dream was to be a doctor but failing to do so did not prevent her from being a special person who could make a difference.

Unit plan

Speaking: helping people

Reading: a text about "Light Initiative"

Vocabulary: using certain expressions in different contexts

Grammar: revision of present perfect

Listening: three people talking about their personal initiatives

Writing: a process paragraph about helping a disabled boy

Reading

Read the following text then do the tasks below.

Light Initiative

What is 'Light Initiative'?

Light **Initiative** started with two people and now it includes more than 350 volunteers. They voluntarily record school and college books for the benefit of the **visually impaired** people. They started recording the books of the 9th and the 12th grades; they also record university books and **references**. Their aim is to meet the visually impaired people's actual needs whatever they are.

How do they work?

Usually, the visually impaired person who has the desire to study a curriculum or a reference, contacts the initiative administration and **provides** them with the books needed. Then, the book is divided into tasks for a number of volunteers to record them.

Social Media

They use a Facebook page and a YouTube channel. On the Facebook page they **announce** that they finished this book or this **curriculum**, and they use the YouTube channel to publish the recordings. These records are saved in mp3 format.

Service Cost

Their services are **absolutely** free; i.e. the volunteer is not paid, and it doesn't cost the visually impaired person anything. Anyone with a network can have access to their records.

Tools

Volunteers need very simple things. They use mobiles for recording and laptops to do the montage. No professional tools are needed.

What's New?

Light Initiative's new project is turning the Syrian curriculum into **Braille**. This will help Syrian students who suffer from sight problems.

Light Initiative's Target

Light Initiative is trying to bring some light into the visually impaired people's lives.

2. What will these robots be able to do?
3. Are e-books better than traditional ones? Why?
4. Do you think there will be flying cars in the future?
5. What will their advantages be?

Reading

Read the following text, then do the tasks below.

Life in the Future

Life in the future will be very different. **Futurologists predict** that life will probably be very different in all the fields of activity, from entertainment to technology. Some people have imagined that life in the future would be so easy and relaxing, while others have seen that it would be worse and more difficult. I think that in the future we will have a more comfortable life. This will be obvious in all **aspects** of life.

First, as for education, people will have better education because of technology.

E-books will **replace** traditional books, robots will replace teachers, and students will not have to go to schools every day as they will study at home through on-line teaching. So even absent students will learn.

Second, health will **improve**. Technology will also play a very important role in that. New medicines will help people get better. Robots will help doctors and sometimes replace them. Add to that, scientists and researchers will find cure to many diseases like Aids and cancer. So people will live longer.

Third, housing problems will end. People will build houses everywhere. So everyone will have a place to live in.

Fourth, hunger will come to an end. People will grow new types of **crops** everywhere even on the roofs of buildings.

Fifth and last, world peace will spread because of all the previous aspects. The world will have nothing to fight for. Everyone will have education, health, home and food. So everyone will be happier and love will be everywhere.

Transport and Tourism

Speaking

Unit plan

Speaking: discussing questions about transport

Reading: for gist and detailed understanding

Vocabulary: related to the text

Grammar: Determiners

Listening: listening to two people expressing their ideas about the future

Writing: a paragraph about one's dream means of transport

Discuss with your partner the following questions.

1. What form of transport do you usually use?
2. Do you like the transport system in your country? Why?
3. How does transportation affect tourism?
4. Do you think that driverless cars will make journeys quicker?

Reading

Read the following text about autonomous vehicles, then do the tasks below.

Autonomous Vehicles

Some people think that autonomous vehicles will change our lives for the better. They think that they will be safer and transportation will be more **efficient**. However, others believe that autonomous vehicles will cause many problems that need to be solved before they are allowed to become a part of our daily lives.

First, driverless cars will increase unemployment. Thousands of drivers will lose their jobs if autonomous vehicles are **allowed** to take over the roads. Truck drivers, **delivery** drivers, taxi drivers and many other kinds of drivers will lose their jobs. This increase in unemployment could cause serious social problems.

Second, companies and governments will lose money. For example, **insurance** companies now get about fifty percent of their income from car insurance. Governments and cities, too, will lose much money from parking, speeding **fines** and petrol taxes.

Finally, there is no planning. Dramatic change is coming, but governments haven't begun thinking about it. Only some American cities have done long-term planning. Driverless cars could arrive by 2030, but most government **officials** and transport ministers are only worried about short-term problems.

In conclusion, it is possible that autonomous vehicles will not benefit society if they are introduced too quickly. They may cause social chaos through unemployment, **financial** loss and lack of planning. It is important that these issues are addressed before autonomous vehicles are allowed on our roads.

Key Words

efficient: working well without wasting time or energy

allow: to let someone do something/ to permit

delivery: the act of bringing goods, letters etc. to a particular person or place

Science

If you look into the night sky, you may notice the Moon appears to change shape each night. Some nights, the Moon might look like a narrow crescent. Other nights, the Moon might look like a bright circle. On other nights, you might not be able to see the Moon at all. The different shapes of the Moon that we see at different times of the month are called the Moon's **phases**.

Why does this happen? The shape of the Moon isn't changing throughout the month. However, our view of the Moon does change. The Moon does not produce its own light. The source of light is the Sun. Without the Sun, our Moon would be completely dark. What you may have heard referred to as "moonlight" is actually just sunlight reflecting off of the Moon's surface. The Sun's light comes from one direction, and it always lights up one half of the Moon which is the side of the Moon that is facing the Sun and the other side of the Moon becomes dark.

Match the names of the Moon Phases with their correct pictures.

- a- full Moon.
- b- waning gibbous Moon
- c- last quarter Moon
- d- new Moon.
- e- waxing gibbous Moon.
- f- waxing crescent Moon.
- g- waning crescent Moon
- h- first quarter Moon.

Stories from around the world

The Happy Fisherman

Once upon a time there was a king and a queen who had only one son. Their kingdom was very large with fruitful gardens, fountains, swings and many interesting things. They need a few days to go round it. But the king's son, the prince, was always unhappy. Nothing made him happy although the king and the queen did their best, but in vain.

The king and the queen called for most of the doctors and professors in the kingdom to see the prince but they failed to make him happy.

One day, a wise man heard about the prince's problem and knew that the king and the queen were worried about their son. So he went to the king and told him that he had a solution which might solve the problem. He told them that they had to find a truly happy man in the kingdom and the prince should wear the happy man's shirt for a night and a day.

The king asked his servants and guards to search for a truly happy man in the kingdom but nonsense, there was no single happy man in the kingdom.

One day, the king decided to go fishing. While he was on the shore he heard a fisherman singing. He approached him and asked him if he were happy. The fisherman told him that he felt always that he was the happiest man in the whole world and he was pleased with everything throughout his life.

Then, the king was very happy because he thought he had found the man who could lend him his shirt for his son to wear. So the king asked the happy fisherman if he could do him a favour and lend him his shirt for his son. The fisherman laughed and told the king willingly he would, but he continued unfortunately he didn't have any shirt all his life.

The king realised then that wealth wouldn't always bring happiness.

3. Whom do you ask before you make important decisions?
4. Have you ever changed your decision?

Reading

Read the text and do the tasks below.

Learn a Skill and Work with a Will

"Wisdom is knowing what to do next, skill is knowing how to do it and virtue is doing it" (David Star Jordan).

We make thousands of decisions a day. Making a choice is easy. Choosing well takes knowledge and skill. You have many decision-making examples in daily life such as deciding what to wear, what to eat for lunch, what task to do next, choosing which book to read, etc. Decision making is an ongoing process in every aspect of life, large or small. The ability to make a decision and **stick** to it is the cornerstone of good leadership skills. Having critical thinking skills allows one to **ascertain** the problem and come up with a suitable and **beneficial** solution. Before taking a step, we must try to see where possible **potholes** are. This won't just make us stronger moving forward. It will also give us more determination and awareness about what we are deciding.

The decision-making tools help you to **map out** all the possible **alternatives** to your decision, its chances of success or failure. So to make a decision, you must first **identify** the problem you need to solve or the question you need to answer.

What also prevents effective decision-making is when you do not have enough information about your decision. In this case you are making a decision without any **basis**.

Teamwork helps you to make the right decision. You must collaborate with your family members and classmates, at some point, to make your right decision. Time management is very important; since decisions need to be made quickly sometimes, you have to outline the amount of time you have to make your decision. Also, organization is vital in your making a final decision. You should use this skill to find out what results you're looking for and if it's a top priority.

Key Words

stick: to continue doing something in a determined way

ascertain: to find out something

beneficial: having a good effect

potholes: minor difficulties

map out: to plan carefully how something will happen

alternative: something that can be used instead of something else

identify: to recognize someone or something

Listening: to a decision on how to help a village

Writing: about a solution to a definite situation

Reading

Read the text and do the tasks below.

Mothers' Decisions can Change the World

One day Thomas Edison came home and gave his mother a letter from his teacher. As she read the letter, his mother's eyes were tearful. Thomas Edison's teacher wrote that Edison was mentally ill and wouldn't be allowed in school anymore. When Edison asked his mother what this letter was about, she **pretended** to read it

aloud, saying your son couldn't go to school because he was **a genius** and the school was too small for him. "Please teach him yourself." Edison's mother hid the letter and decided to educate young Thomas at home.

THOMAS A. EDISON.

MRS. THOMAS A. EDISON.

Edison was homeschooled by his mother's decision; he wasn't able to memorize lessons and needed hands-on experience to understand and learn things. Edison's mother wasn't **frustrated**; she wanted Edison to be a scientist. He grew up and set up a laboratory at home and began his own experiments. He also set up his own telegraph station and sent out messages by using a train whistle.

At the age of 30, Edison invented the phonograph. His work in a number of fields created the basis for many technologies that we enjoy today. However, like anyone else, he suffered through failure numerous times, but where others **quit**, he persisted. After his mother's death, one day Edison found the hidden school letter, cried for hours and then he wrote in his diary, Thomas Alva Edison was a mentally ill child that, by a hero mother, became a genius. Edison said: "My mother was a great woman, she believed in me and made me one of the greatest inventors".

Key Words

Chemistry

Read the text, then do the following tasks.

We know soap is used to wash the dirt off our hands and bodies. We also know soap is used to wash other things such as the dishes we eat off, the clothes we wear, the dog (when he runs through the mud) and even your mom and dad's car. But have you ever stopped to think about what soap is?

Soap is made from water, ashes and fat from either animals or plants. When the three are mixed together, a chemical reaction takes place. This means the water, ashes and fat turn into something different. They turn into what we call soap.

When the chemical change takes place to make soap, two types of molecules are created, hydrophobic and hydrophilic.

The hydrophobic molecules grab hold of the dirt and oil on your hands or body. The hydrophilic molecules like to mix with water to make bubbles. By working together, the two types of molecules remove the dirt from your body and take it away.

But guess what else happens? The chemical change is so powerful that when soap comes near more fat, the soap acts like a magnet and pulls the fat toward it.

Making bubbles

Try the following experiment.

Bubbles and soap films are made of a thin layer of water, sandwiched between two layers of soap molecules. You can make giant bubbles by mixing these ingredients together:

- 1 liter of water (distilled is preferable, but tap water will do),
- 15 ml good quality washing-up liquid,
- 10 ml glycerol/glycerine (from your supermarket's cake-baking section).

Use your hands to make a hoop-shape. Dip them in the bubble solution and blow gently but firmly. Using this method you should be able to blow bubbles up to about 60 cm in diameter!

Project

Decide to recycle your town's waste materials and objects.

Work in groups of four. Each one can choose a task to do.

- One of your friends collects the materials which can be recycled as glass, paper, metal and plastic.
- Another one buys four containers and puts them in the town centre.
- A third one takes these materials to the recycling factory.
- A fourth one starts distributing brochures in town to shed the light on how recycling is important to save our environment.

Review 1

Read the following text and do the tasks below.

Secrets of a Happy Brain

The human brain remembers negative experiences more easily than positive ones. Our brains have developed this way because threats, and dangerous events, had an immediate effect on our memories compared to positive things like food or shelter. As a result, you likely know what makes you unhappy, but do you know what makes you happy?

Research suggests that our level of happiness depends partly on factors we cannot control – our genes and our life circumstances. However, our level of happiness is also shaped by the choices we make. If you've been chasing wealth, fame, good looks, material things, and power, you may be looking for happiness in all the wrong places. Psychologists suggest that the following six habits make people happier.

People who form close relationships tend to be happier than those who do not. The number of friends we have is not important. What matters is the quality of our relationships. Relationships that bring happiness usually involve the sharing of feelings, mutual respect, acceptance, trust, fun and empathy.

People who make a habit of caring for the well-being of others tend to be happier. This might involve volunteering for an organization or reaching out to support friends and family on a regular basis.

People who exercise regularly improve both their physical and mental well-being. Some research has shown that exercise can be as effective as medicine in treating depression.

When we are so interested in an activity we enjoy that we lose track of time, we are in a state of flow. The activity could be making art, playing piano, surfing, or playing a game. People who experience flow in their work or hobbies tend to be happier.

People are more likely to be happy if they know what their strengths are and use them regularly. People who set goals and use their strengths to achieve them tend to be happier.

People who think positively by being grateful, aware, and optimistic are more likely to be happy. Being grateful means being thankful. Being aware means being open to, focusing on, and enjoying the experiences of the present moment. Being optimistic means being hopeful about the future.

A. Answer the following questions.

1. What are the factors of happiness people can't control?
2. How is happiness put in the wrong places?
3. Who is the happier person according to relationships?
4. When are people in a state of flow?
5. How do people enjoy the present moment?

B. Select the correct answer.

1. What would be a way of caring for the well-being of others?
 - a. volunteering at a home for old people.
 - b. practicing yoga or meditation.
2. What is not part of being aware?
 - a. taking pleasure in what you are doing at this time.
 - b. enjoying the memory of a past experience.
3. Things we cannot control that affect our level of happiness are _____ .
 - a. our genes and our life circumstances.
 - b. the number of volunteer positions we have.
4. Why doesn't the brain remember positive experiences as much as negative ones?
 - a. Positive experiences don't have any important effect on our memories.
 - b. negative experiences don't have any important effect on our memories.

Grammar: Past Perfect

Pronunciation: Diphthongs /ei/

Listening: A story of Mrs. Tyler on the plane

Writing: Correcting sentences (word order)

Reading

Read the text about “Titanic Ship” and do the tasks below.

No One Had Believed it was Possible

In 1912, the “Titanic” hit an iceberg on its first trip across the Atlantic. The Titanic was the largest ship that had ever travelled on the sea. It was carrying 2207 people, but it had taken on enough lifeboats for only 1178 people. Not more than 651 of the passengers were able to get into lifeboats.

Some of the survivors had been in the icy water for hours when they were saved. Most of the passengers hadn't lived long; 1502 people had lost their lives. But why was there such a great loss of life and so few survivors who were on the edge of death?

Nobody had prepared for such a tragedy. Nobody had believed that the Titanic could sink. The steamship company had thought that its ship would be completely safe in all situations. They had followed an old rule for the number of lifeboats, so they had supplied lifeboats for only half the people. The passengers had not yet received their lifeboat numbers, nor had they practiced lifeboat drill before the accident. Many of them had not even dressed warmly, the ship had hit the iceberg late at night, and they did not believe they were in danger. The ship had already received 6 ice warnings on its radio when it struck the iceberg. Nevertheless, it had not changed its direction or its speed. A tragedy like the sinking of the Titanic should never happen again.

A. Answer the following questions.

1. What happened to the Titanic ship in 1912?
2. Why were the survivors so cold?
3. Why hadn't the steamship company prepared for the tragedy?
4. How many people survived this horrible accident?

Sky Walkers

A selfie is a self-portrait photograph, typically taken with a digital camera or a smart phone, which may be held in the hand or supported by a selfie stick. Selfies are often shared on social media services such as Facebook, Twitter, Snapchat, and Instagram.

When Marat Dupri bought his camera, he decided he would **shoot** nice landscape pictures. Feeling it might not have been the most original idea ever, he started to **spice things up** by climbing up higher and higher structures, using no safety equipment at all. Marat Dupri earned the name of "The sky walker"; and quickly, dozens of people followed his footsteps, trying to get the most **incredible** views.

Then most people began to take dangerous selfies while travelling. They began **scaling skyscrapers**, cliffs and bridges to capture a photo to remember. Almost everyone has taken out their smart phones to snap a photo of themselves. But many studies showed that when taken in dangerous circumstances, selfies can cause death.

This Instagram shot was taken by Angela Nikolau, from Tianjin, China. Some might even say "It's too dangerous". How did she even get there?!

This is also one of many pictures snapped by Daniel Lau, one of the world's most well-known photographers. In this photo, the skyscrapers of Hong Kong set the shocking scene.

At last, we can say that this kind of art seems to have been lost somewhere between the ground and the sky. Be careful not to spoil this art and use it for lovely memories and beneficial issues. Take care of yourselves and other people around you. Putting yourselves at risk is useless; it sounds to be a crazy idea. Our lives are very precious and valuable. We shouldn't lose them by irresponsible behaviours.

Key Words

- to shoot:** to take a photograph of something
- to spice up:** to add interest or excitement to something
- incredible:** impossible or very difficult to believe
- scaling:** climbing to the top of something very high and steep
- skyscrapers:** very tall buildings in a city
- beneficial:** having a good effect

A. Answer the following questions.

1. What do people use to take selfies?
2. What did Marat Dupri decide when he bought his camera?
3. When are selfies dangerous?
4. In your opinion, what does the writer mean by "art seems to have been lost somewhere between the ground and the sky"?

B. Complete the sentences in A with their suitable endings in B.

A	B
1. "The sky walker" is a name that was given	a. to shoot a selfie.
2. "How did Angela Nikolau get to Tianjin, China?" is a question that occurred	b. to lose their lives.

Algebra

- Algebra is a branch of mathematics dealing with symbols and the rules for manipulating those symbols.
- Basics of Algebra cover the simple operation of mathematics like addition, subtraction, multiplication, and division involving both constant and variables. For example, $x+10 = 20$. This introduces an important algebraic concept known as equations.
- Learning algebra helps to develop your critical thinking skills. That includes problem solving, logic, patterns, and reasoning.

Stories from around the world

The Boastful Turtle

Once upon a time there was a turtle who had a dream. His dream was that he wanted to fly. He always complained about the matter. He was ready to do anything that could make him fly. The turtle was always unsatisfied and angry because his flippers weren't wings and his shell made him too heavy to fly. He was annoyed that other turtles were happy with swimming, and aren't jealous of the birds who could do the thing he could only dream of. The turtle, finally, asked a goose if she could help him to try flying. She told the other geese about the turtle's demand. The geese wanted to help the turtle and began to think of a way that could make his dream true. Finally, they came up with an idea. They decided that two of the geese would hold a stick which the turtle could hold with his strong mouth.

While the geese were flying, the selfish turtle couldn't help keeping silent. He looked at all the turtles who were swimming in the river below. He opened his mouth boasting about how wonderful flying was and that they would never fly like him. But he forgot that the moment he opened his mouth he would fall down and never fly or even swim again.

A. Answer the following questions.

1. What was the dream of the turtle?
2. Why couldn't he fulfil his dream?
3. How did the geese help the turtle?
4. Think of another end for the story.
5. What is the moral of the story?

B. Combine the answers to summarise the story/

Who Deserves the Award?

Mariam was a teacher who wanted to motivate her students and make them do their best in the exam. So, she told them that she would give a gift, which was a new pair of shoes, to the one whose marks would be excellent. Children **rejoiced** over this **challenge** and they all started writing **diligently**. After collecting the papers, the teacher was surprised to find that everyone had a full mark.

Who would get the gift? she thought. The teacher thanked everyone for their effort but she was confused about who would deserve the award as everyone had got the full mark.

The teacher thought of a suitable solution with her students. The students' opinion was that each of them would write his/her name on a **folded** paper and put it in a box from which the teacher would pick one. So, the paper will **reveal** the name of the award's winner.

Indeed, the teacher picked a paper in front of all students and read the child's name [Nada], and said: "you are the owner of the award". With joy and tears in her eyes, Nada came forward where the shoes were. She thanked everyone for this wonderful gift. Her parents couldn't **afford** to buy her new shoes because of their extreme poverty.

The teacher returned home crying and told her husband what had happened. He was surprised and wanted to know the reason of her tears. She said: "When I opened the rest of the papers, I found that all the students had written the same name [Nada]".

Killing Time is not a Murder!!!

Time is precious! We should never waste it in any way. People can spend a lot of time doing various things, but they can never get back the time they had spent. That is why most of successful people consider time more important and valuable than money.

We all should use our time in **productive** ways. If you master the technique of managing time **efficiently**, you can achieve anything in your life. Time management helps you to **attain** more with less effort.

In the beginning, it will feel like a boring task, but when you do it regularly, you realize that it only helps you to increase your productivity. Eventually, this will encourage you to achieve more in life. Being productive doesn't mean that we have to be involved in multiple tasks at the same time.

The proverb, "killing time is not a **murder**; it's a **suicide**" is **applicable** for those who don't understand the value of time and don't respect it. People who say that they don't have enough time to complete their work, don't really know how to manage time. For those, here is an easy way to help them apply the "Do It Now" **principle**:

D = Divide what you have to do.

O = Organise your materials.

I = Ignore interruption.

T = Take the time to learn how to do things yourself.

N = Now, not tomorrow.

O = Opportunity is knocking. Take advantage of opportunities.

W = Watch out for time stealers. Control how much time you spend on the Internet, reading and sending emails, watching TV, or talking on the phone.

Time is the greatest gift of God. Therefore, we should know how to invest it.

Social Studies The History of Time Measurement

Ancient humans used simple observation to dictate the time. They used the stars to guide them through the change of day and seasons.

Then, the sundial was developed. It was the first solar-powered clock.

Egyptians then created four-sided obelisks that throw away a shadow on the ground to show what time of day it was.

The water clock was created by the ancient Greeks.

It was used to keep track of the hours of night time, but could be used in the day as well.

The hourglass is yet another piece which was made from two separate glass bulbs that had been rounded. They were connected with a narrow neck made of glass between the two bulbs.

Unit plan

Speaking: talking about someone who affected your life

Reading: a text about inspiring people

Grammar: passive voice / past simple

Pronunciation: /ɔ/ + /ɔ:/

Listening: a dialogue about changing technology

Writing: completing a paragraph with suitable words

Read the following text and do the tasks below.

Touch People's Hearts

Have you ever been **inspired** by someone to change your life in a **significant** way that made you healthier, happier, or more **fulfilled**? If so, then you understand how inspiration can create a positive difference in a person's life. Inspiration is powerful. If you want to be positive and capable of inspiring others, here are some tips to follow.

- Show people you care. Remember how many times your day was changed by questions like "How are you today?" or "Is everything going well with you?" said by a friend. Your actions are very important too. Many people's lives are inspired by small acts of kindness.
- Earn trust. If you are told a secret by a friend, it stays between you and him/her. Trust takes a long time to be built, but in many cases it can be destroyed in no time.
- Keep your promises. If someone is being helped by a **volunteer**, he/she needs to do it with a smile. Life has many examples of promises that are kept to save many people's lives. Therefore, you should be wise enough to keep your word no matter what it takes.
- It is easy to **criticise** people, but that doesn't mean it's the right thing to do. Think about it: "How did you react when your intelligence was being once insulted by someone? Or, if your clothing, or your performance had been criticised in a negative way?" Whether the criticism was **justified** or not, sure you would get upset. No one likes to be criticized, so if you don't have anything positive to say, don't say it at all.
- Be an active listener. Words other people say can be heard, but not many people can actively listen to and comprehend those words to fully understand the meaning behind them. Make an eye contact if someone talks to you about their problems, and ask follow-up questions to show them you care.

Key Words

inspired: motivated

significant: important enough to be noticed

fulfilled: happy and satisfied

volunteer: to offer to do something without being forced to do it or without getting paid for it

criticise: to talk about someone's faults

justified: having an acceptable reason

Let's Communicate in a Different Way!

Body language refers to the nonverbal **signals** that we use to communicate. According to experts, these nonverbal signals make up a huge part of our daily communication. From our facial expressions to our body movements, the things we don't say can still **convey** volumes of information.

Unit plan

Speaking: A discussion about facial expressions

Reading: a text about communicating in different ways

Vocabulary: words related to communication

Grammar: possessive and reflexive pronouns

Listening: a letter from Adam to his friend

Writing: completing a paragraph using the students' ideas

It was suggested that body language itself may account for between 60 to 65% of all communication. A smile may **indicate** approval or happiness. A frown can signal disapproval or unhappiness. In some cases, our facial expressions may reveal our true feelings about a particular situation. While you say that you are yourself feeling fine, the look on your face may tell people otherwise. Happiness, sadness, anger, surprise, disgust and fear are just a few examples of emotions that can be expressed through facial expressions. The expression on a person's face himself can even help **determine** if we trust or believe what he/she is saying.

Facial expressions are also among the universal forms of body language. The expressions used to convey fear, anger, sadness, and happiness are similar throughout the world. The arms and legs can also themselves be useful in conveying nonverbal information. Crossing legs away from another person may indicate dislike or discomfort with that individual. Crossing the arms can indicate defence, being self-protective. **Clasping** the hands behind the back might indicate that a person is feeling bored, **anxious**, or even angry. Rapidly tapping his/her fingers can be a sign that a person is bored, impatient, or **frustrated**. Crossed legs can indicate that a person is feeling in need of privacy. So when you are evaluating somebody, pay attention to the body language, which could tell many unspoken words.

Some research suggest that **deaf** people may be especially skilful at picking up visual traits in the actions of others through their body language because they are trained on using sign and body language.

Key Words

signal: an action that shows what someone feels

convey: to make ideas, feelings known to somebody

indicate: to be a sign of something

determine: to find out the facts about something

clasping: holding something tight in your hand

anxious: worried about something

What is Matter?

Matter is the "stuff" that makes up the universe. Everything that takes up space and has mass is matter. Matter is made up of atoms, which are in turn made up of protons, neutrons and electrons. There are four natural states of matter: solids, liquids, gases and plasma. Solids have a definite shape, as well as mass and volume, and do not take the shape of the container in which they are placed. In a liquid, the particles are more loose and are able to flow around each other. Therefore, the liquid will take the shape of its container. In a gas, the particles have a great deal of space between them and have high moving energy. A gas has no definite shape or volume. Plasma is not a common state of matter here on Earth, but it may be the most common state of matter in the universe. Stars are essentially superheated balls of plasma.

Stories from around the World

Three Wishes

Once there lived a woodcutter with his wife. He used to cut wood in the forest and sell them in the market. This was the only means of his livelihood.

One day, he went to cut wood in the forest. There he saw a very big tree in front of him. He thought of cutting the whole tree to get more wood.

As the woodcutter picked up his axe to cut the tree, he heard a voice, "Please do not cut this tree." The woodcutter stopped and looked here and there, but he found no one. He thought it to be an illusion. Then a fairy spoke from the tree, "I am a fairy and I live in this tree. If you cut it, I will be homeless, the winter is approaching fast and I will die of cold. Do not destroy my home. I will fulfil your three desires instead."

The woodcutter was very happy. Now he could be rich without doing any work. He accepted the fairy's offer and ran to his house to tell his wife about this. His wife was waiting for him as usual. She was surprised to see the woodcutter back so early and said, "You look very happy. What is the matter?"

The woodcutter replied, "I got a big treasure today. I will get a treasure soon." And he started dancing.

The woodcutter narrated the whole incident to his wife. His wife jumped out of joy. The woodcutter said, "I am hungry. Give me something to eat." His wife said, "I have not prepared anything till now. Wait, I will just prepare something for you." The woodcutter said, "No, do not cook anything. I can fulfil any three desires. Now as the first one, I want sweets and hot pudding."

As soon as he uttered these words, a plate of hot pudding came before him. He ate to his satisfaction and the plate continued to fill again and again. Then he asked his wife also to eat the tasty pudding. But she was very angry and said, "You have wasted one chance, and now I wish that the pudding should be pasted on your nose!" The pudding immediately stuck to his nose. The woodcutter got annoyed and said, "Oh, what a fool you are!" He tried to clear the pudding from his nose, but the pudding remained stuck. He scolded his wife and said, "You have wasted the second chance while we can ask for lots of money."

The woodcutter got irritated and continued screaming: "I wish that the pudding of my nose should vanish immediately!" The pudding vanished. This way, the woodcutter and his wife failed to avail the golden opportunity and remained poor as before.

A. Answer the following questions

1. What did the man do for a living?
2. What did the fairy offer him?
3. Why did his wife become angry after dinner?
4. How did they lose the golden opportunity?

B. Connect the answers to summarise the story.

It's not always easy to be a good son. Sometimes, you make a mistake and can't find a way to fix it. Other times, you disagree with your parents and don't know how to talk to them without starting a fight. What shall you do?

Show your love

Tell your parents what's going on in your life. Your parents love you and want to know what's going on in your life. They need to know all of the daily details, but they would love to know what's on your mind, from your struggles with your studies to any big problems you're having with your friends. They really do care, and even if they can't always help, they would just like to know what's happening. Don't be afraid to ask for their advice. Believe it or not, your parents were once your age, and they've gone through the same struggles that you're going through. They'll appreciate that you value their opinion.

Be kind to your siblings

It's sometimes difficult to get along with your siblings, whether they are older or younger, but you should try to develop relationships with them. You can help your siblings do their schoolwork, or clean up. This will not only help you be a good example to your siblings, but it will also help your parents.

Do as well in school as you can

Your parents will be happy if you respect your teachers, do your homework, and keep your grades up to the best of your ability. If you need help in school, ask your teachers or your parents for help. This will put you on a path to succeed in your future, and it will also make life much easier for your parents.

At the end of the day, the thing that will please your parents the most is to see their son/daughter growing into a happy, responsible adult.
